

Dear colleagues,

the great success of our examination course on the wrist, pushes us to highlight this event. It is a unique occasion to see patients together with experts, discuss indications and different surgical procedures. You can then assist the chosen procedures the next day in life surgery.

The focus of our meeting this year will be on ligament injuries of the wrist. We want to contrast this with the challenging problems all around the PIP joint. For selected participants we will continue with our double workshop on cadavers at the IRCAD in Strasbourg. The first 40 registered participants will be admitted. The course will deal with either open or arthroscopic surgery. Official language will be English.

We hope to see you in Markgröningen for what is sure to be an exciting and productive symposium.

Best regards,

Prof. Dr. Max Haerle
