

## XVI<sup>TH</sup> FESSH MEETING

**THURSDAY 26 MAY 2011**
**HALL A**
**SESSION 1: TENDONS/LIGAMENTS - CLINICAL AND BASIC 1**

<b>08:00-10:00</b>	<b>Chair:</b> M Ceruso (Italy), S Abrahamsson (Sweden)
08:00 <b>INV 1</b>	<b>Flexor tendon repairs: methods, outcomes, and biomechanical basis</b> Jin Bo Tang (China)
08:30 <b>OPS 1 / A-0142</b>	<b>A comparison of controlled passive motion and early active motion following flexor tendon repair zone 2: a pilot-study</b> MH Eissens, S Romkema, JTW van Loenen, CK van der Sluis (Netherlands)
08:38 <b>OPS 2 / A-0153</b>	<b>What is secondary flexor tendon surgery?</b> CJ Zweifel, H van Dam, D Elliot (Switzerland)
08:46 <b>OPS 3 / A-0159</b>	<b>Bow-string after A1 pulley release of trigger digits: Comparison of open versus percutaneous surgery</b> JP Kim, YH Park (South Korea)
08:54 <b>OPS 4 / A-0269</b>	<b>Risk factors for ruptures after operative treatment of injured flexor tendons</b> S Edsfeldt, M Eklund, M Wiig (Sweden)
09:02 <b>OPS 5 / A-0336</b>	<b>Reconstruction of wrist extension in obstetric brachial plexus palsy using tendon transfer</b> N A van Alphen, M H van Doorn-Loogman, E O van Kooten, J A van der Sluijs, MJPF Ritt (Netherlands)
09:10 <b>OPS 6 / A-0357</b>	<b>Suture of flexor digitorum superficialis improves the results of primary tendon surgery in zone 2. A retrospective study</b> I Z Rigó, M Røkkum (Norway)
09:18 <b>OPS 7 / A-0411</b>	<b>Predicting risk of flexor pollicis longus tendon rupture after volar plating - The role of post operative radiographs</b> D Selvan, D Brown, D Perry (UK)
09:26 <b>OPS 8 / A-0430</b>	<b>The effect of 2, 4, 6, core tendon sutures on flexor tendon excursion through the pulley system; a cadaveric study</b> M Racy, A Simpson, M Nassimizadeh, J Dabis, A Hunter, V Rajaratnam (UK)
09:50 <b>OPS 10 / A-0537</b>	<b>The treatment of Zone 1 flexor tendon injuries using micro bone anchors</b> S Huq, D Boyce (UK)

**THURSDAY 26 MAY 2011****HALL C****INSTRUCTIONAL COURSE PART 1: THE TRAPEZIOMETACARPAL JOINT**

<b>08:00-10:00</b>	<b>Chair:</b> R Thorkildsen, M Røkkum (Norway)
08:00	<b>Introduction</b>
08:10	<b>Evidence based surgical treatment of trapeziometacarpal osteoarthritis</b> GM Vermeulen (Netherlands)
08:25	<b>Cemented prostheses</b> L de Smet (Belgium)
08:45	<b>Spherical arthroplasty and hemiarthroplasty</b> BD Adams (USA)
09:00	<b>The Arpe prosthesis</b> T Apard (France)
09:10	<b>The Elektra prosthesis</b> TB Hansen (Denmark)
09:30	<b>The Motec prosthesis</b> A Reigstad (Norway)
09:40	<b>Discussion</b>

**THURSDAY 26 MAY 2011**

HALL D	SESSION 2: SKELETAL DEFECTS, BONE SUBSTITUTES - SEQUELAE FRACTURES - TUMOR/INFECTION
--------	--

<b>08:00-10:00</b>	<b>Chair:</b> R Szabo (USA), L Van Overstraeten (Belgium)
08:00 <b>INV 2</b>	<b>Calcium Phosphate cement - an alternative to bone graft?</b> Mona Winge (Norway)
08:25 <b>OPS 11 / A-0019</b>	<b>Treatment of Kienbock's disease by shortening osteotomy of the radius - Results in Lichtman stages IIIA and IIIB</b> J C Botelheiro, S Silverio (Portugal)
08:33 <b>OPS 12 / A-0129</b>	<b>Reconstruction of humeral Diaphyseal nonunions with vascularized fibular graft</b> T Toros, K Özaksar, TS Sügün, M Kayalar, E Bal, F Özerkan (Turkey)
08:41 <b>OPS 13 / A-0199</b>	<b>Comparative study: Internal fixation versus radial head resection in isolated Mason type III fractures of the radial head</b> L Parra, F Andrade, A Bifani, JM Breyer, P Sotelo, S Von Unger, N Thumm (Chile)
08:49 <b>OPS 14 / A-0206</b>	<b>The tri-ligament tenodesis investigated: A faster way of reaching strength and fixation?</b> S P Kammenga, E S J van der Beek, T M Moojen, H Slijper, R Feitz (Netherlands)
08:57 <b>OPS 15 / A-0212</b>	<b>Skin cancers of the hand - an analysis of the management and outcome of 417 lesions</b> S Maciburko, W A Townley, S Matousek, H Giele (UK)
09:05 <b>OPS 16 / A-0226</b>	<b>Microbiologic spectrum in surgically treated hand infections</b> I Justich, H Winterleitner, G Feierl, R Krause, H Koch (Austria)
09:13 <b>OPS 17 / A-0345</b>	<b>Dorsal scapho-lunar stabilization with Viegas' capsulodesis</b> E J Camus1, L Van Overstraeten2 (France)
09:21 <b>OPS 18 / A-0364</b>	<b>Kienböck's disease in paediatric and juvenile patients</b> K Kalb, T Pillukat, R Schmitt, K-J Prommersberger (Germany)
09:29 <b>OPS 19 / A-0386</b>	<b>The three-ligament tenodesis for the reconstruction of the scapholunate dissociation: Technique and results</b> A Elgammal, H Erne, B Lukas (Germany)
09:37 <b>OPS 20 / A-0387</b>	<b>Subacute scapholunate instability - Our experience with modified Brunelli procedure</b> M Sousa, R Sousa, A Pereira, A Félix, M Trigueiros, C Silva (Portugal)
09:45 <b>OPS 21 / A-0423</b>	<b>Florid reactive periostitis, bizarre parosteal osteochondromatous proliferation, and Turret's exostosis: A continuum of proliferative periosteal processes in the hand</b> E Calif, J Hakim, S Stahl (Israel)

<b>10:00-10:30</b>	<b>COFFEE BREAK, EXHIBITIONS AND POSTER VIEWING</b>
--------------------	---

**THURSDAY 26 MAY 2011**
**HALL A**
**SESSION 3: TENDONS/LIGAMENTS - CLINICAL AND BASIC 2**

<b>10:30-12:00</b>	<b>Chair:</b> Z Szabo (Hungary), E Hagert (Sweden)
10:30 <b>OPS 23 / A-0108</b>	<b>A lactoferrin polypeptide (PXL01) in hyaluronic acid is more effective in reducing adhesion formations after flexor tendon surgery than hyaluronic acid alone</b> M Wiig, K Olmarker, J Hakansson, L Ekström, M Mahlapuu3 (Sweden)
10:38 <b>OPS 24 / A-0144</b>	<b>Prospective morphologic and dynamic assessment of deep flexor tendon healing in Zone II by high-frequency ultrasound using a new thread-tracking method</b> N Lindenblatt, G Puijpe, R Gnannt, D Meyer, G Andreisek, P Giovanoli, M Calcagni (Switzerland)
10:46 <b>OPS 25 / A-0190</b>	<b>Comparison of modified Kessler and Yotsumoto-Dona suture: a biomechanical study on porcine tendons</b> I Z Rigó, J R Haugstvedt, P Ludvigsen, M Røkkum (Norway)
10:54 <b>OPS 26 / A-0194</b>	<b>The effects of 5-fluorouracil on flexor tendon healing by using a biodegradable gelatin slow releasing system: Experimental study in a hen model.</b> MV Karaaltin1, B Ozalp2, M Dadaci, A Kayikcioglu, A Kecik, F Oner (Turkey)
11:02 <b>OPS 27 / A-0205</b>	<b>Testing the first extensor compartment for diagnostic purposes: a new specific test for De Quervain tenosynovitis</b> J Goubau,A Van Tongel, P Van Hoonacker, L Goubau, B Berghs (Belgium)
11:10 <b>OPS 28 / A-0248</b>	<b>Our therapeutic strategy for digital stiffness</b> M Esplugas, V Aixala, JA Pradillo, J Anguera, J Cebral (Spain)
11:18 <b>OPS 29 / A-0258</b>	<b>Anatomy, histology and histomorphometrics of the thumb carpometacarpal ligaments</b> E Hagert, J Lee, AL Ladd (Sweden)
11:26 <b>OPS 30 / A-0259</b>	<b>Immunofluorescent analysis of the innervation patterns of the thumb carpometacarpal ligaments</b> E Hagert, J Lee, AL Ladd (Sweden)
11:34 <b>OPS 31 / A-0306</b>	<b>Presentation of an improved novel injection technique that enhances resolution of de Quervain syndrome</b> T Pagonis, P Givissis, K Ditsios, S Varitimidis, A Pagonis, G Petsatodis, A Christodoulou (Grenada)
11:42 <b>OPS 32 / A-0320</b>	<b>An analysis of the tendon holding capacity of six suture loop configurations</b> TV Karjalainen, M He, AKS Chong, AYT Lim, J Ryhänen (Finland)
11:50 <b>OPS 33 / A-0342</b>	<b>Biomechanical comparison of failure mechanism between two suture techniques for tendon transfer surgery</b> V Tsampa, I Ignatiadis, A Papalois, P Givissis, A Christodoulou, J Fridén (Greece / Sweeden)

**THURSDAY 26 MAY 2011**
**HALL C**
**INSTRUCTIONAL COURSE PART 2: THE FINGER JOINTS**

<b>10:30-12:00</b>	<b>Chair:</b> A Waats (UK), M Røkkum (Norway)
10:30	<b>Is there still a place for silicone MCP or PIP implants?</b> I Trail (UK)
10:45	<b>The MCP-SRA prosthesis</b> A Ibsen (Denmark)
10:55	<b>Pyrolytic carbon MCP arthroplasty</b> P Kopylov (Sweden)
11:05	<b>Approaches to the PIP joint. The PIP-SRA prosthesis</b> D Espen (Italy)
11:15	<b>Pyrolytic carbon PIP Arthroplasty</b> M Ceruso (Italy)
11:25	<b>Vascularised joint transfer - an option?</b> G Dautel (France)
11:40	<b>Discussion</b>

**HALL D**
**SESSION 4: CONGENITAL 1**

<b>10:30-12:00</b>	<b>Chair:</b> A Nachemsson (Sweden), M Winge (Norway)
10:30 <b>INV 3</b>	<b>Treatment of grade I to IIIA thumb hypoplasia</b> G Dautel (France)
10:55 <b>OPS 34 / A-0268</b>	<b>Treatment of club hands in TAR syndrome: results after radialization versus wrist distraction and radialization</b> W Hülsemann, R Habenicht, M Mann (Germany)
11:03 <b>OPS 35 / A-0328</b>	<b>Indications for toe to hand transfer in children with congenital abnormalities of the hand</b> AV Balashov, SI Golyana, A B Oreshkov (Russia)
11:11 <b>OPS 36 / A-0355</b>	<b>The scare-less fetal skin repair: possible application in congenital deformities at the hand</b> A Leti Acciaro, A Russomando, A Landi (Italy)
11:19 <b>OPS 37 / A-0382</b>	<b>Rotation advancement flap for the correction of narrow web-spaces in congenital hand malformations</b> R Habenicht, M Mann (Germany)
11:27 <b>OPS 38 / A-0420</b>	<b>Evaluation of ulna lengthening in radial club hand</b> P Czarnecki, M Redman, L Romanowski (Poland)
11:35 <b>OPS 39 / A-0431</b>	<b>Fingers reconstruction for children with congenital abnormalities by toe to hand transfer</b> SI Golyana (Russia)
11:43 <b>OPS 40 / A-0509</b>	<b>Outcome of flexor digitorum superficialis opponensplasty for type II/IIIA thumb hypoplasia</b> SER Hovius, M de Kraker, RW Selles, JM Zuidam, HM Molenaar, HJ Stam (Netherlands)

**12:00-14:00**
**LUNCH SERVED IN THE EXHIBITION, POSTER VIEWING**

**THURSDAY 26 MAY 2011**
**HALL A**
**SATELLITE SYMPOSIUM** (Lunch box available)

**12:15 -13:45**
**Pfizer**
**Innovating the treatment of Dupuytren's contracture**

M Ceruso (Italy) , Z Szabo (Hungary), C Leclercq (France), L Hurst (USA), J Dias (UK)

**HALL C**
**SATELLITE SYMPOSIUM** (Lunch box available)

**12:15 -13:45**
**DePuy**
**Ligamentoplasty on Wrist InstabilityMP and PIP Joints Arthroplasty**

M Merle

**HALL A**
**SESSION 5: PERIPH NERVES, PLEXUS 1**
**14:00-15:30**
**Chair:** A Bishop (USA), LE Myrseth (Norway)

**14:00  
INV 4**
**Spinal cord surgery restores motor and sensory function in patients with brachial plexus avulsion injury**

T Carlstedt (UK)

**14:30  
OPS 41 / A-0075**
**Secondary thoracic outlet syndrome in patients with clavicle pathology**

M Kapickis, E Lavrinovics, U Krustins, K Verdins (Latvia)

**14:38  
OPS 42 / A-0138**
**Cross-sectional area of neural fascicles as a guideline in neural transplantation surgery in the upper extremity**

P Nedeljkovic, M Bumbasirevic, V Bumbasirevic, V Bascarevic, N Ostojic (Serbia)

**14:46  
OPS 43 / A-0273**
**The relationship of limb hypoplasia in obstetrical brachial plexus palsy with injury severity, surgery, recovery and growth**

S Maciburko, H Giele (UK)

**14:54  
OPS 44 / A-0344**
**Nerve transfers vs nerve grafting for shoulder reconstruction in supraclavicular brachial plexus injuries**

N Waughlock, WL Lam, DC Chuang (Sweden)

**15:02  
OPS 45 / A-0368**
**Neurogenic thoracic outlet syndrome - surgical experience, indication, surgical experience and results in a series of 59 patients**

G Weigel, Ch Karner, W Girsch (Austria)

**15:10  
OPS 46 / A-0432**
**Less is more; a cadaveric demonstration of the difference in length of ulnar nerve required for contralateral C7 nerve transfers using the prevertebral route as compared to the subcutaneous route**

M Racy, M Nassimizadeh, A Simpson, J Dabis, A Hunter, V Rajaratnam (UK)

**15:18  
OPS 47 / A-0436**
**Surgical restoration of pediatric forearm supination deformity in obstetric brachial plexus palsy**

O Berkoz, T Ozkan, HU Aydin, A Aydin, S Ozkan (Turkey)

**THURSDAY 26 MAY 2011**
**HALL C**
**SESSION 6: ARthroPLASTIES 1**

<b>14:00-15:30</b>	<b>Chair:</b> M Boeckstyns (Denmark), R Thorkildsen (Norway)
14:00 <b>OPS 48 / A-0032</b>	<b>Surface arthroplasty of proximal interphalangeal joint with avanta prosthesis</b> A Donadelli, E Carita (Italy)
14:08 <b>OPS 49 / A-0096</b>	<b>Revision arthroplasty of the PIP-joint after primary failure of a silicone implant</b> St Schindeler, T Keuchel, D Herren (Switzerland)
14:16 <b>OPS 50 / A-0229</b>	<b>A 5-year prospective outcome study of PI2 pyrocarbon interposition arthroplasty for the treatment of thumb carpometacarpal joint (CMCJ) osteoarthritis</b> L Ardoouin, P Bellemere, F Chaise, E Gaisne, M Genestet, T Loubersac (France)
14:24 <b>OPS 51 / A-0271</b>	<b>Avanta SR-MCP Arthroplasties, a prospective consecutive study for five years</b> A Ibsen-Sorensen (Denmark)
14:32 <b>OPS 52 / A-0272</b>	<b>Avanta SR-PIP Arthroplasty, a prospective study for six years</b> A Ibsen-Sorensen (Denmark)
14:40 <b>OPS 53 / A-0282</b>	<b>The Elektra prosthesis for total replacement of the first CMC-Joint. Prospective study with follow-up of one to six years</b> A Ibsen-Sorensen (Denmark)
14:48 <b>OPS 54 / A-0296</b>	<b>Proximal interphalangeal hemi-joint replacement</b> K Pettersson, C Carlsson, J Niklasson (Sweden)
14:56 <b>OPS 55 / A-0338</b>	<b>High failure rate treating CMC 1 osteoarthritis with PI2® pyrocarbon prosthesis</b> J van Aaken, N Holzer, L Wehrli, F Delaquaize, J Y Beaulieu (Switzerland)
15:04 <b>OPS 56 / A-0400</b>	<b>EBRA - a software tool for early prediction of prosthesis failure of the carpometacarpal joint of the thumb</b> AA Tandara, LJ Capeller, M Jarczok, P Mayrhofer, B Helbig, M Jung, W Daecke (Germany)
15:12 <b>OPS 57 / A-0429</b>	<b>Short term outcomes of Trapeziectomy versus pyrocarbon interposition implant (PI2) arthroplasty for thumb carpometacarpal osteoarthritis- preliminary results</b> M Maru, P Jettoo, M Jones, L Tourret, L Irwin (UK)
15:20 <b>OPS 58 / A-0498</b>	<b>Pyrolytic metacarpophalangeal implants in osteoarthritis</b> JL Roux, G Meyer zu Reckendorf, Y Allieu (France)

**THURSDAY 26 MAY 2011**
**HALL D**
**SESSION 7: CONGENITAL 2**

<b>14:00-15:30</b>	<b>Chair:</b> S Vilkki (Finland), E Eide (Norway)
14:00 <b>OPS 59 / A-0012</b>	<b>Madelung´s deformity: Treatment with osteotomy of the radius and insertion of a trapezoidal wedge</b> EJL De Paula, R Mattar Jr, MR Rezende, EN Franca (Brazil)
14:08 <b>OPS 60 / A-0039</b>	<b>The rehabilitation of children's with congenital humeroradial synostosis I</b> Shvedovchenko, A Minkin (Russia)
14:16 <b>OPS 61 / A-0040</b>	<b>The choice of technology of surgical treatment at congenital club hand</b> I Schvedovchenko, A Koltsov, A Minkin (Russia)
14:24 <b>OPS 62 / A-0042</b>	<b>Surgical management of arthrogryposis in the upper extremity</b> O Agranovich, A Baindurashvili, E Petrova, D Buklaev, S Trofimova, E Kochenova (Russia)
14:32 <b>OPS 63 / A-0055</b>	<b>The tunnel carpal syndrome in the children</b> A Leti Acciaro, M Lando, S Sartini, P Ferrari, A Landi (Italy)
14:40 <b>OPS 64 / A-0165</b>	<b>Congenital isolated radial nerve palsy: case series and literature review</b> M Cheema, K Kuti, A Souied, A Jester, R Lester (UK)
14:48 <b>OPS 65 / A-0183</b>	<b>Role of Krukenberg's operation in rising of possibility of self-service at children</b> IV Schvedovchenko, AU Urchenko, AA Koltsov (Russia)
14:56 <b>OPS 66 / A-0211</b>	<b>Distraction osteosynthesis in the pediatric hand surgery: factors affecting osteoreparation</b> V Zavarukhin, A Baindurashvili, S Golyana, A Govorov (Russia)
15:04 <b>OPS 67 / A-0252</b>	<b>Modified reconstruction of radius in type Bayne III radial club hands using microvascular epiphyseal transfer of second metatarsal bone and joint</b> SK Vilkki, P Paavilainen, E Chow, PC Ho (Finland)
15:12 <b>OPS 68 / A-0267</b>	<b>Thrombocytopenia absent radius (TAR) syndrome: clinical features</b> W Hülsemann, R Habenicht, M Mann (Germany)
15:20 <b>OPS 69 / A-0523</b>	<b>A rare congenital disorder: cleft hand, a review of 8 cases</b> A Aydin, SK Yazar, M Ljohiy, CM Erer (Turkey)

**15:30-16:00**
**COFFEE BREAK, EXHIBITIONS AND POSTER VIEWING**

**THURSDAY 26 MAY 2011**
**HALL A**
**SESSION 8: PERIPH NERVES, PLEXUS 2**

<b>16:00-18:00</b>	<b>Chair:</b> C Bonnard (Switzerland), S Hovius (Netherlands)
16:00 <b>OPS 70 / A-0027</b>	<b>Reconstruction of long radial nerve defects due to high energy humerus fractures</b> G Yusuf, K Murat, T Tulgar, K Ozaksar, S Sadik Tahir, A Yalcin (Turkey)
16:08 <b>OPS 71 / A-0028</b>	<b>Ulnar nerve injury in crossed pin fixation in pediatric supracondylar fractures of the humerus</b> J Rois, G Culen, A Ergun, P Stergar, A Meznik (Austria)
16:16 <b>OPS 72 / A-0098</b>	<b>Ultrasonic 3D visualisation of ulnar nerve compression at elbow: Plea for focal decompression</b> S Beeharry (France)
16:24 <b>OPS 73 / A-0184</b>	<b>Conservative treatment of cubital tunnel syndrome: Observational retrospective study</b> S De Santis, P Bortot, V Padovan, A Ghezzi, C Novelli, G Pajardi (Italy)
16:32 <b>OPS 74 / A-0214</b>	<b>Ulnar nerve neurotization to biceps motor neurons - a critical evaluation of 19 cases and detailed literature review</b> M Rezende, N Rabelo, E de Paula, R Mattar (Brazil)
16:40 <b>OPS 75 / A-0277</b>	<b>The efficacy of brachial plexus block in diabetic patients: A prospective study</b> SM Isaac, JJ Dias, A Gaur (UK)
16:48 <b>OPS 77 / A-0361</b>	<b>Traumatic axonotmesis condition: A procedure for the best peripheral nerve recovery by the autologous vascularized epineurial transposition</b> A Messina (Italy)
16:56 <b>OPS 78 / A-0366</b>	<b>Double distal median to ulnar neurotisation after high ulnar nerve lesions: a retrospective analysis and comparison with a control group</b> T Giesen, C Hess, I Plock, N Forster, A Schiller, P Giovanoli, M Calcagni (Switzerland)
17:04 <b>OPS 79 / A-0381</b>	<b>Nerve repair by means of tubulization: literature review and personal clinical experience</b> MA Martin-Ferrero, J J Marcos, F Obregon (Spain)
17:12 <b>OPS 80 / A-0383</b>	<b>Neurotization of the posterior interosseous nerve with a branch of the anterior interosseous nerve in radial nerve palsy : Anatomical study and surgical technique</b> Y Vinclelet, S Barbary, G Dautel (France)
17:20 <b>OPS 81 / A-0433</b>	<b>Cubital tunnel syndrome- an epidemiological study at a tertiary referral centre</b> M Racy, K Whitcroft, T McBride, A Omar, V Rajaratnam (UK)
17:28 <b>OPS 82 / A-0458</b>	<b>Ultrasonographic identification of peripheral nerves of the hand and forearm</b> IG Dhoulovskaia, AV Scoroglyadov, NA Eskin, DA Magdiev (Russia)
17:36 <b>OPS 83 / A-0500</b>	<b>Thermoregulatory vascular responses are not altered in nerve injury induced cold intolerance in rats</b> LS Duraku, ES Smits, SP Niehof, RW Selles, SEH Hovius, ET Walbeehm (Netherlands)

**THURSDAY 26 MAY 2011**
**HALL C**
**SESSION 9: ARthroPLASTIES 2**

<b>16:00-18:00</b>	<b>Chair:</b> B Adams (USA), O Reigstad (Norway)
16:00 <b>OPS 85 / A-0037</b>	<b>Total wrist type „Remotion - SBI“ in orthopedic trauma-patients. Implantation via less invasive approach</b> DR Hager, LS Bodell, SM Froschauer, H Schoeffl, O Kwasny (Austria)
16:08 <b>OPS 86 / A-0059</b>	<b>Long-term results (more than 10 years) follow up of total joint arthroplasty in the treatment of thumb carpometacarpal joint osteoarthritis</b> MH Martin-Ferrero, C Vega, J Aurelio Lomo (Spain)
16:16 <b>OPS 87 / A-0072</b>	<b>Results of the total modular wrist prosthesis in revision total wrist arthroplasty: A retrospective study of 18 cases</b> P Bijlsma, LCM Keijser (Netherlands)
16:24 <b>OPS 88 / A-0250</b>	<b>Non-viable proximal pole of the scaphoid: APSI vs isolated scaphoidectomy</b> AG Pereira, M Massada, R Sousa, S Amorim, M Trigueiros, R Lemos, C Silva (Portugal)
16:32 <b>OPS 89 / A-0256</b>	<b>Results of the Universal II Total Wrist Prosthesis in patients with Rheumatoid Arthritis and in patients with Post-Traumatic Arthritis</b> RAM Blomme1, TM Moojen2, H Stijper3 (Netherlands)
16:40 <b>OPS 90 / A-0295</b>	<b>The maestro total wrist implant- a two-year follow-up</b> K Pettersson, C Carlsson, J Niklasson (Sweden)
16:48 <b>OPS 91 / A-0303</b>	<b>Universal 2 prosthetic replacement of the wrist</b> S Pfanner, G Guidi, M Ceruso (Italy)
16:56 <b>OPS 92 / A-0329</b>	<b>The Elektra prosthesis for the CMC joint of the thumb after follow-up of 10 years; 48 cases</b> P-J Regnard (France)
17:04 <b>OPS 93 / A-0416</b>	<b>Total wrist arthroplasty for rheumatoid arthritis. Results of the first 21 patients operated</b> C Silva, M Trigueiros, R Lemos, A Pereira, M Guedes, R Sousa, R Aido (Portugal)
17:12 <b>OPS 94 / A-0450</b>	<b>An online registry for total wrist replacement</b> MEH Boeckstyns, G Herzberg, A Ibsen Sørensen, P Axelsson, PP Borelli (Denmark)
17:20 <b>OPS 95 / A-0459</b>	<b>Novel pyrocarbon interposition arthroplasty for the wrist when radiocarpal and midcarpal joint destruction.</b> Ph Bellemere, Th Loubersac, E Gaisne, M Genestet, A Thebaud, C Maes (France)
17:28 <b>OPS 96 / A-0497</b>	<b>Trapeziectomy and tendon interposition for the osteoarthritis of the trapeziometacarpal joint: Benefits of the anchovy anchor fixation and tendon suspension</b> B Amara, R Matasa (Belgium)
17:36 <b>OPS 97 / A-0503</b>	<b>The distal radius replacement and resurfacing prosthesis for complex intra-articular fractures</b> JL Roux (France)
17:44 <b>OPS 98 / A-0536</b>	<b>Ulnar Head Implant Arthroplasty for Treatment of Arthritis of the DRUJ</b> BD Adams (USA)

**THURSDAY 26 MAY 2011**
**HALL D**
**SESSION 10: FRACTURES HAND, CARPUS**

<b>16:00-18:00</b>	<b>Chair:</b> M Garcia-Elias (Spain), I Neergård Sletten (Norway)
16:00 <b>OPS 99</b> / A-0013	<b>Complex wrist injuries: fractures of the lunate</b> EJL De Paula, R Mattar Jr, MR Rezende, EN Franca (Brazil)
16:08 <b>OPS 100</b> / A-0106	<b>Minimally invasive surgical treatment of scaphoid fractures</b> Z Dailiana, L Papatheodorou, S Varitimidis, GA Komnos, A Christou, KN Malizos (Greece)
16:16 <b>OPS 101</b> / A-0132	<b>Operative treatment of avulsion fracture of flexor digitorum profundus</b> HJ Kang, IH Koh, YJ Kim, JG Lee, YR Choi (South Korea)
16:24 <b>OPS 102</b> / A-0147	<b>Treatment of metacarpal fractures experience with internal fixation</b> V Melnikov (Russia)
16:32 <b>OPS 103</b> / A-0152	<b>Double trapezial sign in scaphoid nonunion</b> Y M Lee, S W Song, Y J Suh, J M Park (South Korea)
16:40 <b>OPS 104</b> / A-0154	<b>A percutaneous transtrapezial approach to scaphoid fractures does not lead to ST degeneration</b> G Geurts, RP van Riet, G Meermans, F Verstreken (Belgium)
16:48 <b>OPS 105</b> / A-0162	<b>Percutaneous transtrapezial screw fixation of the scaphoid fractures</b> SW Kang, HM Kim, CH Jeong, SU Lee, IJ Park (South Korea)
16:56 <b>OPS 106</b> / A-0168	<b>Optimal fixation of acute scaphoid fractures - A cadaveric study</b> S Luria, Lenart L, Lenart B, Peleg E, M Kastelec (Israel)
17:04 <b>OPS 107</b> / A-0179	<b>Functional conservative treatment of proximal phalangeal fractures using the Lucerne Cast (LuCa) - Do we have to immobilize the wrist?</b> T Franz, U von Wartburg, AR Jandali, S Schibli-Beer, M Calcagni, U Hug (Switzerland)
17:12 <b>OPS 108</b> / A-0223	<b>Clinical and radiological results after operative treatment of mallet fracture</b> L Reissner, A Platz, M Kilgus (Switzerland)

**FRIDAY 27 MAY 2011**
**HALL A**
**SESSION 13: DUPUYTRENS**

<b>14:00- 15:30</b>	<b>Chair:</b> C Leclercq (France), JJ Dias (UK)
14:00 <b>OPS 136 / A-0002</b>	<b>Genome-wide association study finds 9 susceptibility Loci for Dupuytren's disease and suggests a major role for WNT-signaling</b> GHCG Dolmans, PMN Werker, HC Hennies, D Furniss, EA Festen, L Franke, K Becker, P van der Vlies, BHR Wolffenbuttel, S Tinschert, MR Toliat, M Nothnagel, A Franke, N Klopp, H-E Wichmann, P Nürnberg, H Giele, RA Ophoff, C Wijmenga (Netherlands)
14:08 <b>OPS 138 / A-0276</b>	<b>Ultrastructural study of radial Dupuytren's disease</b> E MacKenney, D Perea, P Hernandez Ros (Spain)
14:16 <b>OPS 139 / A-0286</b>	<b>Change in range of motion and degree of contracture after treatment with collagenase clostridium histolyticum for Dupuytren's contracture: Pooled analyses from 2 multinational double-blind trials</b> J Witthaut, S Wilbrand, H Kushner, P Szczypa, RA Gerber (Sweden)
14:24 <b>OPS 140 / A-0287</b>	<b>Efficacy and tolerability of collagenase clostridium histolyticum in European patients with Dupuytren's contracture: Results from a multicenter, open-label study</b> J Witthaut, S Wilbrand, R Milner, C Bainbridge, DE Boyce, H Kushner, RA Gerber, P Szczypa (Sweden)
14:32 <b>OPS 141 / A-0292</b>	<b>Collagenase clostridium histolyticum for the treatment of Dupuytren's contracture: Mechanism of action and tissue effects</b> P Szczypa, R Gerber, FTD Kaplan, A Cole, SGE Hart (UK)
14:40 <b>OPS 142 / A-0299</b>	<b>Efficacy and safety of collagenase clostridium histolyticum (CCH) in patients who had previous hand surgery</b> C Bainbridge, RA Gerber, P Szczypa, B Cohen, M-P Hellio Le Graverand (UK)
14:48 <b>OPS 143 / A-0316</b>	<b>The Southampton Dupuytren's scoring scheme</b> A Mohan, J Vadher, H Ismail, D Warwick (UK)
14:56 <b>OPS 144 / A-0410</b>	<b>5-year results of randomized clinical trial on treatment in Dupuytren's disease: percutaneous needle fasciotomy versus limited fasciectomy</b> AL van Rijssen, H ter Linden, PMN Werker (Netherlands)
15:04 <b>OPS 145 / A-0418</b>	<b>Treatment of severe Dupuytrens contracture by homo- or heterodigital flaps</b> B Lukas, M Lukas (Germany)
15:12 <b>OPS 146 / A-0516</b>	<b>Surgical management of Dupuytren's disease across 12 European countries: an analysis of patient charts</b> J Dias, C Leclercq, LB Dahlin, C Bainbridge, PP Szczypa, JC Cappelleri, Y Kyriazis, RA Gerber (UK)

**FRIDAY 27 MAY 2011**
**FORUM**
**SESSION 14: MICROSURGERY-REPLANTATION 1**

<b>14:00- 15:30</b>	<b>Chair:</b> P Liverneaux (France), A Reigstad (Norway)
<b>14:00 INV 7</b>	<b>Vascularized bone grafting for scaphoid nonunion: clinical and experimental studies</b> A Bishop (USA)
<b>14:25 OPS 147 / A-0127</b>	<b>Formative hand surgery by combined use of hand and microsurgical techniques and an external fixator</b> H Gotani, Y Yamano (Japan)
<b>14:33 OPS 148 / A-0196</b>	<b>Composite free venous flaps in the reconstruction of composite digital defects: A clinical experience in 31 patients</b> M Karaaltın, A Özdemir, A Erdem, K Yıldız, AM Akkus, FN Yogen, AC Akpinar, SS Ergün, E Guneren (Turkey)
<b>14:41 OPS 149 / A-0216</b>	<b>Direct and reverse metacarpal flaps: A review of 32 cases</b> P Tos, R Adani, A Vigasio, B Battiston (Italy)
<b>14:49 OPS 150 / A-0263</b>	<b>Severe upper limb injuries with or without neurovascular compromise in children and adolescents. Analysis of 31 cases</b> I Ignatiadis, D Arapoglou, V Tsiampa, E Drampalos, V Papakonstantinou, T Karinos, G Konstantopoulos, N Gerostathopoulos (Greece)
<b>14:57 OPS 151 / A-0356</b>	<b>Microvascular monitoring with a novel laser doppler imaging system</b> W Raffoul, P Erba, M Fridreich (Switzerland)
<b>15:05 OPS 152 / A-0398</b>	<b>The use of venous flaps in reconstruction of digital defects: Experience with the shunt-restricted technique for improved survival and reliability</b> N Waughlock, WL Lam, Lin YT (Sweden)
<b>15:13 OPS 153 / A-0434</b>	<b>Analysis of consistency of the perforated radial forearm flap</b> M Nassimizadeh, M Racey, A Simpson, J Dabis, A Hunter, R Vaikunthan (UK)
<b>15:21 OPS 154 / A-0479</b>	<b>Vascularized second toe joint transfer for finger PIP reconstruction : 34 cases with 4,6 years follow-up</b> M Pozzetto, S Barbary, N Gibert, T Jager, A Dederichs, F Dap, G Dautel (France)

**FRIDAY 27 MAY 2011**
**HALL D**
**SESSION 15: FRACTURES**

<b>14:00- 15:30</b>	<b>Chair:</b> J Messina (Italy), T Husby (Norway)
14:00 <b>INV 8</b>	<b>Treatment of forearm malunions with pro-supination limitations</b> F Stockman (Belgium)
14:30 <b>OPS 155 / A-0056</b>	<b>Corrective osteotomy for malunited fractures of the distal radius</b> OM Semenkin, Sergey N Izmalkov, Denis V Kulikov (Russia)
14:38 <b>OPS 156 / A-0297</b>	<b>12-month follow-up of 230 intraarticular (AO-C fractures) distal radius fractures operated with a dorsal pi-plate and a volar T-plate</b> K Pettersson, D Reiser, Ö Wallgren (Sweden)
14:46 <b>OPS 157 / A-0330</b>	<b>Distal radius malunion - two bone osteotomy and factors affecting decision making</b> R Kebrle, Z Vodicka (Czech Republic)
14:54 <b>OPS 158 / A-0393</b>	<b>Management of distal metaphyseal and diaphyseal radius/ulna fractures in Children: A retrospective analysis</b> R Khokhar, J McMaster (UK)
15:02 <b>OPS 9 / A-0435</b>	<b>Analysis of effects of combinations of pulley resections in flexor tendon bowstringing of digits</b> M Nassimizadeh, A Simpson, M Racey, J Dabis, A Hunter, R Vaikunthan (UK)

**15:30 – 16:00**
**COFFEE BREAK, EXHIBITIONS AND POSTER VIEWING**
**HALL A**
**SESSION 16: IS THERE A PLACE FOR ROBOTS IN HAND SURGERY?**

<b>16:00- 17:00</b>	<b>Chair:</b> PA Liverneaux (France)
16:00	<b>Introduction by moderator</b>
16:05	<b>Replantation in a pig with 2 robots</b> PA Liverneaux (France)
16:15	<b>Robotic microsurgical anastomosis of vessels</b> R van der Hulst (Netherlands)
16:25	<b>Tendon transfert with Da Vinci robot</b> M Bednar (USA)
16:35	<b>Robotic surgery in brachial plexus injuries</b> JC Garcia (Brazil)
16:45	<b>Discussion</b>

**HALL A**
**FESSH GENERAL ASSEMBLY**
**17:00- 18:00**
**FESSH General Assembly**

OPS=Oral presentation Surgeon / PPS = Poster Presentation Surgeon / INV=Invited Speaker

**FRIDAY 27 MAY 2011**
**FORUM**
**SESSION 17: MICROSURGERY-REPLANTATION 2**

<b>16:00- 17:00</b>	<b>Chair:</b> G Dautel (France), M Røkkum (Norway)
16:00 <b>OPS 159 / A-0007</b>	<b>Thumb reconstruction by partial great toe transfer with short pedicle procedure</b> S Barbary, M Pozzetto, N Gibert, A Dederichs, T Jager, F Dap, G Dautel (France)
16:08 <b>OPS 160 / A-0044</b>	<b>Posterior interosseous artery island flap - Clinical results with special focus on donor site morbidity</b> M Wiedner, M Neuwirth, M Hubmer, H Koch (Austria)
16:16 <b>OPS 161 / A-0045</b>	<b>Thumb reconstruction by grafting skeletonized amputated phalanges &amp; soft tissue cover</b> M Murshid, K Naser Khalid (Qatar)
16:24 <b>OPS 162 / A-0173</b>	<b>The posterior interosseous flap - our experience of 28 clinical cases</b> GM Verega, A Midoni (Moldova)
16:32 <b>OPS 163 / A-0254</b>	<b>Does posttraumatic thumb reconstruction effectively improve hand function?</b> D Parvizi, S Spendel, H Koch (Austria)
16:40 <b>OPS 164 / A-0485</b>	<b>To tunnelise or not the pedicle of a flap?</b> B Bajdik, B Lenkei, Z Czinke, Zs Szabo (Hungary)

**HALL D**
**SESSION 18: DRUJ**

<b>16:00-17:00</b>	<b>Chair:</b> R Luchetti (Italy), L Adolfsson (Sweden)
16:00 <b>OPS 165 / A-0217</b>	<b>Selected soft tissue repair of the TFCC to restore stability of the DRUJ</b> STP Kouwenhoven, AR Koch, T de Jong (Netherlands)
16:08 <b>OPS 166 / A-0234</b>	<b>Spontaneous reduction of DRUJ after ulnar shortening in ulnar impaction syndrome</b> YM Lee, S W Song, Y J Sur (South Korea)
16:16 <b>OPS 167 / A-0280</b>	<b>Early results of a prospective case series with the APTIS total DRUJ implant</b> P Axelsson (Sweden)
16:24 <b>OPS 168 / A-0407</b>	<b>Retinaculum sling with capsule plication for reducible DRUJ instability - technique and results</b> A Filius, EH Coret, HP Slijper, JB Jaquet, JH Coert (Netherlands)
16:32 <b>OPS 169 / A-0447</b>	<b>Modified Sauve-Kapandji procedure for DRUJ derangement</b> SW Song, YM Lee, YJ Suh, SK Rhee (South Korea)
16:40 <b>OPS 170 / A-0463</b>	<b>Comparison between open and arthroscopic TFCC bony repair for post-traumatic DRUJ instability</b> R Luchetti, A Atzei, R Cozzolino (Italy)
16:48 <b>OPS 171 / A-0521</b>	<b>New MR image for the diagnosis of peripheral TFCC injury</b> E Correa Vazquez, S Martinez Martos, J Font Segura, X Mir Buno (Spain)
16:54 <b>OPS 84 / A-0017</b>	<b>Outcomes of distal radioulnar joint arthroplasty</b> S Kakar, P Swann, K Perry, AY Shin, SL Moran (USA)

**19:30**
**CONGRESS DINNER AT THE OSLO OPERA HOUSE**

**FRIDAY 27 MAY 2011**
**SPISERIET MØLLER POSTER SESSION 2 FESSH**

<b>PPS 97</b>	<b>Dupuytren's contracture: a retrospective database analysis to assess clinical management and costs in England</b> C Bainbridge, R Perry, R Thompson, RA Gerber (UK)
<b>PPS 98</b>	<b>Histologically confirmed heterotopic ossification of Dupuytren's disease: Case Report</b> Athanasou N, McNab I (UK)
<b>PPS 99</b>	<b>The dorsal lateral transposition flap for advanced stages of Dupuytren's disease</b> L Walle, KJ Prommersberger, J van Schoonhoven (Germany)
<b>PPS 100</b>	<b>Angular correction in Dupuytren's fasciectomy with excision of retrovascular cords</b> R Savage J H M Brown A Yewlett (UK)
<b>PPS 101</b>	<b>The Southampton Dupuytrens Scoring Schemes</b> DJ Warwick A Mohan J Vadher H Ismail (UK)
<b>PPS 102</b>	<b>Compressive neuropathies in malunited fractures of distal radius</b> C Vuckovic, D Polojac, D Raspopovic, A Todorovic, S Andjelkovic, M Pavicevic (Serbia)
<b>PPS 103</b>	<b>Triceps tendon reconstruction of the annular ligament with or without ulnar osteotomy for old dislocations of the radial head</b> T Husby, O Wiig (Norway)
<b>PPS 104</b>	<b>The extensor tendon ruptures after volar fixed-angle plate fixation for unstable distal radius fractures</b> SW Kang, YG Chung, IJ Park, JY Lee, SW Song (South Korea)
<b>PPS 105</b>	<b>Posterior elbow dislocation associated with ipsilateral shaft fracture radio. Case report and review of the literature</b> OIC Izquierdo Corres, Oscar EDF Domínguez Font, Enric JCR, Castellanos Robles Juan (Spain)
<b>PPS 106</b>	<b>Bone bridge resection to correct distal radius deformities following a phyeal growth arrest</b> PYB PY Barthel, PJ P Journeau, GL G Lonjon, BI B. Ilharreborde, PL P. Lascombes, FF F Fitoussi, GD G Dautel (France)
<b>PPS 107</b>	<b>Vascularized epiphysis and joint transposition in pediatric mutilated hand: two cases report</b> JuiTien Shih (Taiwan)
<b>PPS 108</b>	<b>Reverse radial osteocutaneus flap in reconstruction of thumb (Case report-long term result)</b> G Kertész, J Kovács, M Macsári, Z Zakupszky, T Bányai (Hungary)
<b>PPS 109</b>	<b>Side swipe injury as a difficult, complex operative and salvaging microsurgical treatment</b> A Stritar, M Šolinc (Slovenia)
<b>PPS 110</b>	<b>Upper limb salvage following near skeletallisation - a case report and a review of the literature</b> Bhat W, Nikkhah D, Williams AM, Bourke G (UK)
<b>PPS 111</b>	<b>Is adipofascial flap the trick to prevent adhesions after plating of the proximal phalanx? A case report</b> A Nistor, C Fusetti, M Ionac, S Lucchina (Switzerland)
<b>PPS 112</b>	<b>A New Fixation Method Used In Digital Replantation And Toe-To-Finger Transfer</b> Mehmet Veli Karaaltin, Adnan Erdem, Azimet Özdemir, Kemallettin Yıldız, Selma Sönmez Ergün, Ethem Guneren (Turkey)

**FRIDAY 27 MAY 2011**
**SPISERIET MØLLER    POSTERS FESSH**

<b>PPS 114</b>	<b>Emergency all-in-one reconstruction in complex injuries of the upper limb</b> A Georgescu, I Matei, I Capota, F Ardelean, O Olaru (Romania)
<b>PPS 115</b>	<b>Heterodigital adipofascial flap; A new method for finger skin cover</b> P Paavilainen S Vilkki (Finland)
<b>PPS 116</b>	<b>Coverage by the emergency free flap in severely traumatized extremities with joint exposure</b> CSJ, Choi KBC, Kwon LYB, Lee (South Korea)
<b>PPS 117</b>	<b>Long-term subjective and functional evaluation after thumb replantation with special attention to the Quick DASH questionnaire and a specially designed trauma score called modified Mayo score</b> D Parvizi, H Koch, FM Haas, S Spendel (Austria)
<b>PPS 118</b>	<b>The Reconstructive Modalities In Multi-level Upper extremity and Hand Injuries: A Clinical Experience With 43 Patients</b> Mehmet Veli Karaaltin, Adnan Erdem, Semih Baghaci, Azimet Özdemir, Kemalettin Yıldız (Turkey)
<b>PPS 119</b>	<b>Ectopic Single Finger Transplantation, Reporting the "Piggy Back" Method</b> Shahram Nazerani Adel Ebrahimpoor (Iran)
<b>PPS 120</b>	<b>Replantation and revascularization in adult and children</b> F Lembo, L Annacontini, D Parisi, A Portincasa (Italy)
<b>PPS 121</b>	<b>Free Medial Plantar Perforator (MPAP) Flap for the Resurfacing of Finger Defect</b> Ching-Hung Lai, Wen-Lung Liang, Chung-Sheng Lai, Sin-Daw Lin, Kao-Ping Chang (Taiwan)
<b>PPS 122</b>	<b>A retrospective analysis of complications needing secondary surgery in a series of 851 local hand flaps</b> T Karjalainen, S Sebastian, KG Chee, YP Peng (Finland)
<b>PPS 123</b>	<b>Long term Follow-up after bilateral forearm replantation</b> D Hager A Kastner R Schnelzer H Schoffl GM Huemer O Kwasny (Austria)
<b>PPS 124</b>	<b>Thumb replantation</b> B Popova Ruseva E Mateva St Georgiev (Bulgaria)
<b>PPS 125</b>	<b>Perforator flap of forearm - Anatomy and Clinical Application</b> AKY Choi, M Lam, PT Chan, YF Chan, YY Chow (Hong Kong)
<b>PPS 126</b>	<b>10 years experience in digital replantations</b> F Andrade, R Ide, A Bifani, M Méndez, J Breyer, X Ahumada, H Jimenez (Chile)
<b>PPS 127</b>	<b>Modified Camitz opponensplasty using transverse carpal ligament loop pulley in patients with advanced carpal tunnel syndrome</b> YG Chung, SW Kang, JY Lee, SW Song (South Korea)
<b>PPS 128</b>	<b>Reconstruction of the medial collateral ligament of the elbow after de resection of paraarticular osification</b> M R Morro, D Pacha, M Llusa, J Nardi, I Bori, C Martínez, S Rodríguez (Spain)
<b>PPS 129</b>	<b>Are the extensor tendons of your patients safe on your first wrist arthroscopies?</b> F Corella, M Ocampos, B Del Campo, D Escobar, M Del Cerro (Spain)
<b>PPS 130</b>	<b>Dry arthroscopical treatment of a lunate cyst and a rupture of the TFCC</b> E Correa Vazquez, A Isart Torruella, J Font Segura, X Mir Buño (Spain)

**FRIDAY 27 MAY 2011**
**SPISERIET MØLLER    POSTERS FESSH**

<b>PPS 131</b>	<b>Permanent luxation of the distal radio-ulnar joint. Long term results</b> S K Vilkki, J Havulinna, P Paavilainen, K Kask (Finland)
<b>PPS 132</b>	<b>TFCC Reattachment after Traumatic Instability: A Simple Alternative to Arthroscopic Management</b> G Mantovani, E Argintar, A Pavan (Brazil)
<b>PPS 133</b>	<b>Microsurgical reconstruction of the wrist joint in children</b> AV Govorov, SI Golyana, VI Zavarukhin (Russia)
<b>PPS 134</b>	<b>Ultrasonographic research method in the diagnosis of injuries to triangular fibrocartilage complex</b> Magdiev DA, Chulovskaya IG, Egiazaryan KA (Russia)
<b>PPS 135</b>	<b>Ulnar head replacement-a series of 51 patients with maximum 10 year follow up</b> DJ Warwick S Shyalaman E Balabanidou (UK)
<b>PPS 136</b>	<b>Release of the cutaneous nerve in patients with allodynia</b> H Arino, K Nemoto, M Amako, K Yamamoto, T Tsuchihara (Japan)
<b>PPS 137</b>	<b>Effects of botulinum toxin-a injection on healing of repaired rabbit Achilles tendons and tensile strength</b> S Tuzuner, S Incegolü, Ö Özkan, T Akkaya, N Erin, S Özkaraynak (Turkey)
<b>PPS 138</b>	<b>An anatomic study of the stabilizing ligaments of the trapeziometacarpal joint: role of the dorsoradial and deep anterior oblique ligaments in trapezium, Bennett and Rolando fractures</b> C Lamas (Spain)
<b>PPS 139</b>	<b>The effect of CD-HA application on autograft flexor tendon reconstructon in canine in vivo model</b> FE Karabekmez, A Duymaz, PC Amadio, J Ikeda, SL Moran, K An, C Zhao (Turkey)
<b>PPS 140</b>	<b>Longitudinal Motion of the Flexor Tendon and Subsynovial Tissue in Carpal Tunnel Syndrome: Ultrasound Assessment with Speckle Tracking and In Vivo Validation</b> Y Yoshii, J Henderson, SL Moran, KN An, PC Amadio (Netherlands)
<b>PPS 141</b>	<b>Influence of restrained stress on the sensory nervous system in a rat neuropathic pain model</b> M Amako, K Nemoto , H Arino, K Yamamoto, Y Tsuda, T Tsuchihara (Japan)
<b>PPS 142</b>	<b>Using Hall effect sensors in Detecting &amp; monitoring nerve signals by Magnetic flux</b> Roghie Hassanzadeh, Maghsoud hassanzadeh (Iran)
<b>PPS 143</b>	<b>Median nerve deformation in differential finger motions: ultrasonographic comparison of carpal tunnel syndrome patients and healthy controls</b> AB Mink van der Molen, J Henderson, Y Yoshii, KN An, PC Amadio (Netherlands)
<b>PPS 144</b>	<b>Prevention of Instability of the Proximal End of the Radius After Radial Head Resection Using an Anconeus Muscle Flap</b> K Nishida, N Iwasaki, T Funakoshi, M Motomiya, A Minami (Japan)
<b>PPS 145</b>	<b>Digastric olecranon osteotomy: feasibility study of a new approach to the elbow</b> P Cottias K Camara P Liverneaux (France)
<b>PPS 146</b>	<b>Double V-shaped supracondylar osteotomy of the humerus for the treatment of completely dislocated elbow combined with total elbow arthroplasty</b> Hideki ishii, Kenji Tsunoda, Tomohito Yoshihara, Hirofumi Tanaka, Masamori Shigematsu, Akihiko Asami (Japan)

**FRIDAY 27 MAY 2011**
**SPISERIET MØLLER    POSTERS FESSH**

<b>PPS 147</b>	<b>Clinical results and prognostic factors after surgical treatment for coronoid process fractures</b> HJ Kang, IH Koh, YJ Kim, JG Lee, YR Choi (South Korea)
<b>PPS 148</b>	<b>The radial capitellum fractures: surgical treatment options</b> S Odella, R Sartore, F Torretta (Italy)
<b>PPS 149</b>	<b>The result of fixation using PMMA external fixation for cubitus versus deformity</b> Mehmet Ali Acar, Tunç Cevat, ÖDün Hacı, Mustafa Özdemir, Hakan Denaran (Turkey)
<b>PPS 150</b>	<b>Our experience with GPS II (Gravitational Platelet Separation) system in Chronic Epicondylitis in last 3 years</b> Zs Gergely, G Kertész, G Janositz, Gy Kovács (Hungary)
<b>PPS 151</b>	<b>Personal technique for carpometacarpal arthritis</b> G Brunelli (Italy)
<b>PPS 152</b>	<b>Universal Ź Total Wrist Arthroplasty: a mid-term follow-up study</b> A Ferreres, A Lluch, M del Valle (Spain)
<b>PPS 153</b>	<b>The comparison of two surgical techniques for osteoarthritis of the trapeziometacarpal joint: interposition arthroplasty versus hematoma and distraction (Average Follow-up 6,8 years)</b> M Corain (Italy)
<b>PPS 154</b>	<b>“ForgetMeNot” a new digital tourniquet: procedures and benefits</b> S Facca, S Gouzou, P Liverneaux (France)
<b>PPS 155</b>	<b>Swanson-Prothesis in Bouchard Arthrose: is still indicated?</b> K Moussa, A Martini (Germany)
<b>PPS 156</b>	<b>The results of the treatment of thumb carpometacarpal arthritis by trapezium resection and modified thumb metacarpal suspension arthroplasty</b> I Walaszek, A Zyluk (Poland)
<b>PPS 157</b>	<b>Early results after Pyrocarbon interposition in partial trapezectomy</b> R Legre, D Ould Ali, A Gay (France)
<b>PPS 158</b>	<b>Pyrolytic Carbon Arthroplasty for the Proximal Interphalangeal joint</b> S A Mashhadi, M A Pickford (UK)
<b>PPS 159</b>	<b>A plastic surgical prosthetics department's 5 year experience with the use of finger prostheses</b> DA Dewing, KD Anderson, G Woolley, J McPhail, P McArthur (UK)
<b>PPS 160</b>	<b>Treatment of Kienböck's disease with vascular bundle implantation and temporary triscaphe arthrodesis; long term results</b> M Ceruso, G Checcucci, E Russo (Italy)
<b>PPS 161</b>	<b>Spearhead Procedure for Repair of Web Space Burn Sequelae in hand reconstruction</b> M. Costagliola, A Midoni (Moldova)
<b>PPS 162</b>	<b>The use of the reverse dorsal metacarpal flap in hand reconstruction - our experience of 18 clinical cases</b> GM Verega, A. Midoni (Moldova)
<b>PPS 163</b>	<b>Tumb arthritis at stage 2; treatment by implant of pyrocarbon prosthesis: results and complications</b> S Odella, R Sartore, F Torretta (Italy)

FRIDAY 27 MAY 2011

SPISERIET MØLLER POSTERS FESSH

PPS 164	<b>Mini-propeller flaps in fingers reconstruction</b> A Georgescu, I Matei, F Ardelean, I Capota (Romania)
PPS 165	<b>Management and outcomes of fingertip injuries in children</b> S Sepehripour, AJ Patel, M Kitcat, PH Gillespie (UK)
PPS 166	<b>Injection of Botulinum Toxin in the upper limb: Accuracy of placement using manual palpation and surface markings</b> KD Anderson, A El-Gawad, J McPhail, P McArthur (UK)
PPS 167	<b>Mini-flaps based on dorsal digital and metacarpal arteries for digital reconstruction</b> I Ignatiadis, D Arapoglou, V Tsiampa, G Konstantopoulos, E Drampalos, T Karinos, V Papakonstantinou, N Gerostathopoulos (Greece)
PPS 168	<b>Distal Interphalangeal Joint Arthrodesis with Headless Compression Screw: Morphometric and Functional Analysis</b> Il-Jung Park, Joo-Yup Lee, Yang-Guk Chung, Seok-Whan Song (South Korea)
PPS 169	<b>Complications in wrist arthroplasty. Our Experience</b> J Oteo, A Lovik, D Cecilia, P Merino (Spain)
PPS 170	<b>Outcomes of using a virtual learning system to teach hand surgery</b> V Rajaratnam (UK)
PPS 171	<b>Palmar plate interposition arthroplasty of mp-joints in non-rheumatoid patients</b> B von Maydell, M Richter (Germany)
PPS 172	<b>Case Report: Initial experience with real-time intra-operative 3D imaging for sentinel lymph node biopsy (SLNB) in melanoma</b> S Naji, A Tadros, J Traub, C Healy (UK)
PPS 173	<b>A review of outcomes of modified soft tissue reconstruction for rheumatoid metacarpophalangeal joint (MCPJ) Swanson arthroplasty</b> R Savage, U Abdulkadir (UK)
PPS 174	<b>Artelon CMC Spacer in treatment of basal thumb osteoarthritis</b> A Melotto, G Pozzi, A Borgonovo (Italy)
PPS 175	<b>Treatment of scapholunate dissociation by modified dorsal ligamentoplasty</b> D Ira, I Cizmar, J Pilny, M Krticka, M Masek (Czech Republic)

**FRIDAY 27 MAY 2011**

**SPISERIET MØLLER**      **POSTERS FESSH**

PPS 176	<b>Splinting for the treatment of thumb basal joint osteoarthritis</b> M Okazaki, K Sato, T Nakamura, Y Toyama, H Ikegami (Japan)
PPS 177	<b>Short to medium results using the re-motion total wrist replacement rheumatoid arthritis</b> ASC Bidwai, F Cashin, G Wilson, A Richardson, DJ Brown (UK)
PPS 178	<b>Statin-induced focal myositis of the upper extremity. A report of two cases</b> M Wagner, B Hohendorff, R Schmitt, KJ Prommersberger (Germany)
PPS 179	<b>Versatility of the saphenous vein graft to treat post traumatic ulnar artery thrombosis at Guyon's Canal: a report of 2 cases</b> F Plotard, G Herzberg (France)
PPS 180	<b>Supracondylar fractures with persistent circulatory failure after primary operative treatment, results more than 1 year after open exploration and revascularization</b> C Grimsgaard, O Reigstad, R Thorkildsen, A Reigstad, M Røkkum (Norway)
PPS 181	<b>Total wrist arthrodesis with two staples: Surgical Technique and Results</b> J Jeudy, Z Belkheyar, S Durand, C Oberlin (France)
PPS 182	<b>Replacement of finger joint mechanism in patients with osseointegrated titanium screws</b> H Håkanson, A Björkman, G Lundborg, E Ståhl Wernersson (Sweden)
PPS 183	<b>Analysis of different flap techniques for the reconstruction of the thumb</b> A Bifani, G Morgan, F Andrade, A Hasbun, C Ibarra, D Amenabar (Chile)
PPS 184	<b>Epidemiology and Socioeconomic Impact of Hand-Flexor-Tendon Injuries: Results of an extensive Literature Survey</b> E Ntouvali, Z Dailiana (Greece)
PPS 185	<b>CT arthrography of the wrist - Is it a useful investigation?</b> S Shyamsundar, K Jeyapalan, J J Dias (UK)
PPS 186	<b>Underwater camera case for intraoperative photography in hand surgery</b> S Tuncer, T Ozkan (Turkey)
PPS 187	<b>Cervantes and brachial plexus palsy</b> DA Serin, A Aydin, HU Aydin, M Erer (Turkey)

FND FRIDAY

**SATURDAY 28 MAY 2011**
**HALL A**
**SESSION 19: CTS**

<b>08:00- 10:00</b>	<b>Chair:</b> J Goubeau (Belgium), B Finsen (Norway)
08:00 <b>OPS 172 / A-0046</b>	<b>The patient's point of view about informed consent (IC): a prospective study in carpal tunnel surgery</b> S Brunetti, S Lucchina, G Garavaglia, C Fusetti (Switzerland)
08:08 <b>OPS 173 / A-0047</b>	<b>Should aspirin be stopped before tunnel carpal surgery</b> S Brunetti, L De Abate, G Garavaglia, S Lucchina, C Fusetti (Switzerland)
08:16 <b>OPS 174 / A-0054</b>	<b>Interest of Canaletto® implant for recurrent carpal tunnel decompression: about 20 cases</b> S Facca, A Bilasy, A Bureggah, S Gouzou, P Liverneaux (France)
08:24 <b>OPS 175 / A-0065</b>	<b>A comparison of the effectiveness of carpal tunnel release in patients with CTS diagnosis based on only clinical vs clinical and electrophysiological grounds</b> A Zyluk, Z Szlosser, P Puchalski (Poland)
08:32 <b>OPS 176 / A-0073</b>	<b>The surgical zones of the carpal tunnel</b> MJ Young, DA Campbell (UK)
08:40 <b>OPS 177 / A-0097</b>	<b>Carpal tunnel release under local anaesthesia with or without epinephrine</b> S Beeharry, P Michel (France)
08:48 <b>OPS 178 / A-0100</b>	<b>Triggering of the digits following carpal tunnel surgery; a coincidence or a consequence?</b> MA Acar, TC Öğün, N Karalezli (Turkey)
08:56 <b>OPS 179 / A-0236</b>	<b>The auditory and visual reaction time in early stage of carpal tunnel syndrome</b> R Hassanzadeh (Iran)
09:04 <b>OPS 180 / A-0249</b>	<b>Open versus mini-open procedure for carpal tunnel release: A prospective randomised study</b> I Iriberry, L Payán, S Lobato, M del Valle, C Canales, F Martínez (Spain)
09:12 <b>OPS 181 / A-0315</b>	<b>Flexor retinaculum reconstruction after CTS release. Long term review of 248 cases</b> A Lluch (Spain)
09:20 <b>OPS 182 / A-0325</b>	<b>Changes in shape and displacement of the median nerve and tendons in the carpal tunnel; Parameters for assessment of carpal tunnel syndrome</b> A Filius, J-WH Korstanje, Y Hoendervangers, HP Slijper, SER Hovius, RW Selles (Netherlands)
09:28 <b>OPS 183 / A-0326</b>	<b>Carpal tunnel syndrome in children</b> J Bahm (Germany)
09:36 <b>OPS 185 / A-0389</b>	<b>Median nerve deformation and displacement in the carpal tunnel during index finger and thumb motion</b> Y Yoshii, J Henderson, KN An, PC Amadio (Netherlands)
09:44 <b>OPS 186 / A-0417</b>	<b>Carpal tunnel release: Comparison of the classic open technique with the a mini open technique</b> S Varitimidis, N Karamanis, Z Dailiana, A Lagaras, K Malizos (Greece)

**SATURDAY 28 MAY 2011**

FORUM	SESSION 20: FRACTURES RADIUS 1
<b>08:00-10:00</b>	<b>Chair:</b> K Prommersberger (Germany), L Hove (Norway)
08:00 <b>OPS 226 / A-0025</b>	<b>Complications following palmar plate fixation of distal radius fractures: A review of 665 cases</b> P Esenwein, J Sonderegger, B Ellenrieder, J Gruenert (Switzerland)
08:08 <b>OPS 227 / A-0095</b>	<b>Percutaneous pinning of distal radial fractures</b> PS Alm-Paulsen, Ø Rød, K Rød, B Rajabi, H Russwurm, V Finsen (Norway)
08:16 <b>OPS 228 / A-0111</b>	<b>A prospective comparison of self-reported outcome measures and satisfaction scores in patients treated with external fixation versus volar fixed angle plating of unstable closed distal radius fractures</b> LG Warhold, KF Spratt, LS Eickhoff, KM Whyman (USA)
08:24 <b>OPS 229 / A-0114</b>	<b>A prospective comparison of injury and surgical complications in patients treated with external fixation versus volar locking plating of unstable closed distal radius fractures</b> LG Warhold, KF Spratt, LS Eickhoff, KM Whyman (USA)
08:32 <b>OPS 230 / A-0130</b>	<b>Extensor tendon problems due to screw prominences related to palmar locking plating of distal radius</b> TS Sügün, N Karabay, Y Gürbüz, K Özaksar, T Toros, M Kayalar (Turkey)
08:40 <b>OPS 231 / A-0141</b>	<b>Arthroscopic assisted fixation of intra-articular distal radius fractures: A review of the literature and the results of our experience at Tygerberg hospital</b> C Anley, A Ikram, S Pretorius (South Africa)
08:48 <b>OP S232 / A-0161</b>	<b>Risk factors for avulsion injuries of triangular fibrocartilage complex from the fovea of ulnar head in distal radius fractures</b> BC Kwon, SJ Choi, BK Seo, HD Ryu (South Korea)
08:56 <b>OPS 233 / A-0170</b>	<b>Do anti-oxidants modulate the outcome of fractures? A prospective randomized controlled trial</b> M McQueen, C Court-Brown, S Ralston (UK)
09:04 <b>OPS 234 / A-0177</b>	<b>Fixed angle volar plate reducing complications against non-fixed devices in the distal radius fractures.clinical outcomes in 105 patients</b> A Toro, F Collado, P Martínez, S Carbó, C Blancas, A Yunta (Spain)
09:12 <b>OPS 235 / A-0180</b>	<b>Effect on the disability of the upper extremity of conservative management of distal radius fractures. A prospective study</b> P Aparicio, O Izquierdo, J Castellanos, L Costa, JM Soler, A Yunta (Spain)
09:20 <b>OPS 236 / A-0371</b>	<b>Patient-reported disability during the two years following closed reduction and cast or external fixation of displaced distal radius fractures: A prospective cohort study</b> E Brogren, P Wagner, M Petranek, I Atroshi (Sweden)
09:28 <b>OPS 237 / A-0403</b>	<b>Homogeneous groups of patients in acute distal radius fractures? A prospective epidemiologic study about 406 patient</b> G Herzberg, Y Izem, F Plotard, G Mezzadri (France)
09:36 <b>OPS 238 / A-0406</b>	<b>Management of complex distal radius and ulnar fractures: Is the prosthesis of ulnar head a therapeutic option?</b> JC Messina, F Torretta, U Dacatra, S Odella (Italy)
09:44 <b>OPS 239 / A-0443</b>	<b>Low profile plates versus K-wire for treatment of unstable fractures of neck of fifth metacarpal</b> G Kastanis, G Arealis, G Manolarakis, N Solidakis (Greece)
09:52 <b>OPS 240 / A-0444</b>	<b>Open reduction and internal fixation versus indirect reduction and percutaneous fixation for unstable osteoporotic extrarticular distal radius fractures, in patients older than 65 years.</b> G Kastanis, G Areialis, N Solidakis (Greece)

OPS=Oral presentation Surgeon / PPS = Poster Presentation Surgeon / INV=Invited Speaker

**SATURDAY 28 MAY 2011**
**HALL D**
**SESSION 21: EWAS FREE PAPER SESSION**

<b>08:00- 10:00</b>	<b>Chair:</b> T Lindau, UK, J-R Haugstvedt (Norway)
08:00 <b>OPS 199</b>	<b>An Algorithm for Arthroscopy and Stabilization of Intra-articular Distal Radius Fractures</b> T Whipple (USA)
08:15	<b>Discussion</b>
08:20 <b>OPS 200</b>	<b>Clinical results of wrist arthroscopy assistance in articular distal radius fractures</b> F Battistella, M Oldani, M Innocenti, D Prestamburgo (Italy)
08:30	<b>Discussion</b>
08:35 <b>OPS 201</b>	<b>Arthroscopically assisted osteotomy for treatment of intraarticular malunions of the distal radius</b> R Arora, M Gabl (Austria)
08:45	<b>Discussion</b>
08:50 <b>OPS 2020</b>	<b>Isolated lesions of the dorsal capsule of the carpus: an unknown entity, description, technical repair</b> C Mathoulin, N Kerfant (France)
09:00	<b>Discussion</b>
09:05 <b>OPS 203</b>	<b>Diagnostic value of DRUJ arthroscopy</b> T Nakamura, M Okazaki, K Sato, Y Toyama, H Ikegami (Japan)
09:20	<b>Discussion</b>
09:25 <b>OPS 204</b>	<b>Arthroscopic reconstruction of proximal lesions of the TFCC in acute and chronic lesions</b> EM Baur, S Smieja (Germany)
09:35	<b>Discussion</b>
09:40 <b>OPS 205</b>	<b>Osteoscopy</b> P Liverneaux (France)
09:50	<b>Summary of session</b>

**SATURDAY 28 MAY 2011**
**AUDITORIUM**
**SESSION 22: MISCELLANEOUS**

<b>08:00- 10:00</b>	<b>Chair:</b> H Coert (Netherlands), G Pajardi (Italy)
08:00 <b>OPS 206 / A-0023</b>	<b>3D assessment of hand function</b> RA Pearl, HJCR Belcher (UK)
08:08 <b>OPS 207 / A-0030</b>	<b>Development of operative trauma hand surgery skills via simulator based surgical training - an affordable and successful course model</b> S J Muzaffar, E N George, M U Anwar, S Majumder (UK)
08:16 <b>OPS 208 / A-0078</b>	<b>Evaluation of post-operative comfort and early functional results in the treatment of basal thumb arthritis. Comparative prospective study of trapeziectomy with tendon interposition vs MAIA® prosthesis in 74 female patients</b> T Jager, S Barbary, G Dautel, F Dap (France)
08:24 <b>OPS 209 / A-0086</b>	<b>DASH and QuickDASH questionnaires; Average scores in the general population in Norway</b> T Aasheim, V Finsen (Norway)
08:32 <b>OPS 210 / A-0087</b>	<b>Cold intolerance after hand injuries. Disposing factors and long term prognosis</b> L Lied, S Lydersen, V Finsen (Norway)
08:40 <b>OPS 211 / A-0107</b>	<b>Measurement of grip force with a new sensor mat</b> M Mühlendorfer-Fodor, S Ziegler, C Harms, A Cristalli, A Kalpen, G Kundt, T Mittlmeier, KJ Prommersberger (Germany)
08:48 <b>OPS 212 / A-0150</b>	<b>Effectiveness of interventions for secondary Raynaud's Phenomenon - a systematic review</b> BMA Huisstede, P Hoogvliet, WD Paulis, M van Middelkoop, M Hausman, JH Coert, BW Koes (Netherlands)
08:56 <b>OPS 214 / A-0195</b>	<b>The Hand Injuries In The Very young Population: A retrospective investigation of Etiology, Injury type and Treatment Modalities</b> A Özdemir, MV Karaaltın, FN Yıldız, AM Akkus, AC Akpinar, K Yıldız, SS Ergün, E Güneren (Turkey)
09:04 <b>OPS 215 / A-0201</b>	<b>Vascularization of the trapeziometacarpal joint and its clinical importance</b> J Goubau, Sz Benis, B Berghs, P Van Hoonacker, L Patonay (Belgium)
09:12 <b>OPS 216 / A-0262</b>	<b>Changing incidence of sports-related wrist fractures between 1997 and 2007 in a population-based study</b> CE de Putter (Netherlands)
09:20 <b>OPS 217 / A-0266</b>	<b>Health care costs and productivity costs of hand and wrist injuries in a population-based study</b> CE de Putter (Netherlands)

SATURDAY 28 MAY 2011

Program continues on the next page →

**SATURDAY 28 MAY 2011**
**AUDITORIUM**
**MISCELLANEOUS (CONTINUED FROM PREV. PAGE)**

09:28 <b>OPS 218 / A-0283</b>	<b>The development of an outcome based community orientated curriculum for hand surgery education in the UK based on the current practice of a dedicated tertiary referral centre, incorporating the current views of stake holders on changes in the curriculum</b> L Crawford, V Rajaratnam (UK)
09:36 <b>OPS 219 / A-0298</b>	<b>A prospective randomized study between Burton and APL interposition-arthroplasty; - a 10 years follow up</b> D Reiser, O Olesen, C Rude, K Pettersson (Sweden)
09:44 <b>OPS 220 / A-0307</b>	<b>A prospective audit of patient satisfaction with the component parts of carpal tunnel decompression</b> ASC Bidwai, H Benjamin-Laing, S Iqbal, D Shaw, WA Jones, DJ Brown (UK)
09:52 <b>OPS 221 / A-0365</b>	<b>Relocation and/or wrapping of painful neuromas associated with CRPS type II</b> P Ducommun, T Giesen, N Müller, M Kleine, P Giovanoli, M Calcagni (Switzerland)
10:00 <b>OPS 222 / A-0439</b>	<b>The HANDGUIDE study: European treatment guidelines for five non-traumatic hand disorders</b> BMA Huisstede, P Hoogvliet, J Friden, J Soeters, AR Schreuders, HJ Stam, R Selles, SER Hovius, JH Coert (Netherlands)
10:08 <b>OPS 223 / A-0454</b>	<b>Usefulness of B-mode and colour coded ultrasound sonography in hand surgery</b> AH Haug (Germany)
10:16 <b>OPS 224 / A-0504</b>	<b>Our experience in the treatment of trapezium metacarpal arthritis</b> A De Mas, PL Merlo, M Impagnatiello, G Udali, R Turrini, R Mele (Italy)
10:24 <b>OPS 225 / A-0533</b>	<b>Abductor pollicis longus tendon interposition for arthrosis of the first carpo-metacarpal joint. Long term results</b> Lied L, Woje AC, Bjørnstad K, Finsen V (Norway)

**10:00-10:30**
**COFFEE BREAK, EXHIBITIONS AND POSTER VIEWING**

**SATURDAY 28 MAY 2011**
**HALL A**
**SESSION 23: EWAS SYMPOSIUM: European wrist arthroscopy in a Scandinavian setting**

<b>10:30- 12:00</b>	<b>Chair:</b> T Lindau (UK) J-R Haugstvedt (Norway)
10: 30	<b>Arthroscopy assisted reduction of intra-articular distal radius fractures and associated ligamentous injuries. How I do it!</b> J Vasenius (Finland)
10:45	<b>Discussion</b>
10:50	<b>Arthroscopic TFCC sutures in the 90's. The early Norwegian experience</b> T Huseby (Norway)
10:58	<b>Arthroscopic TFCC sutures today</b> J-R Haugstvedt (Norway)
11: 06	<b>Discussion</b>
11:10	<b>Arthroscopic management of scaphoid fractures and its associated injuries</b> P Jorgsholm (Denmark)
11:25	<b>Discussion</b>
11:30	<b>Radio-Scapho-Capitate ligament injuries. Arthroscopic assessment of Mayfield 1 injuries in the absence of scaphoid fractures</b> L Adolfsson (Sweden)
11:40	<b>Discussion</b>
11:45	<b>Epidemiology and arthroscopically assisted treatment of multiple carpal injuries</b> P Jorgsholm (Denmark)
11:55	<b>Summary, Discussion and End of session</b>

**SATURDAY 28 MAY 2011**
**FORUM**
**SESSION 24: FRACTURES RADIUS 2**

<b>10:30- 12:00</b>	<b>Chair:</b> P Saffar (France), Y Krukhaug (Norway)
10:30 <b>OPS 187 / A-0011</b>	<b>Radiocarpal fracture-dislocations: a study of 22 patients</b> EJL De Paula, R Mattar Jr, MR Rezende, EN Franca (Brazil)
10:38 <b>OPS 188 / A-0020</b>	<b>Volar radioscapopholunate arthrodesis as salvage procedure related to intraarticular hardware irritation after volar fixed angle plating in distal radius fractures</b> C Pezzei (Austria)
10:46 <b>OPS 189 / A-0043</b>	<b>Effect of patient age on malunion of distal radius fractures subject to operative treatment</b> N Hollevoet (Belgium)
10:54 <b>OPS 190 / A-0069</b>	<b>Intraarticular AO type C fractures of the distal radius in young patients. Can we expect an early return to work with good functional and radiological results after surgical treatment?</b> F Nienstedt, W Berger, A Obermair, S Huber, E Vorhauser (Italy)
11:02 <b>OPS 191 / A-0079</b>	<b>Epidemiology of fractures of the distal radius</b> SA Aitken, AD Duckworth, MM McQueen (UK)
11:10 <b>OPS 192 / A-0090</b>	<b>Accurate radiographic measurement of the distal radial tilt</b> B Rajabi, Ø Rød, K Rød, PS Alm-Paulsen, H Russwurm, V Finsen (Norway)
11:18 <b>OPS 193 / A-0091</b>	<b>On the relationship between displacement and clinical outcome after Colles' fractures</b> Ø Rød, K Roed, B Rajabi, PS Alm-Paulsen, H Russwurm, V Finsen (Norway)
11:26 <b>OPS 194 / A-0156</b>	<b>Long locking compression plate fixation for distal radius fractures with metaphyseal and diaphyseal extension</b> SK Lee, DW Seo, DS Yang, KJ Kim, WS Choy (South Korea)
11:34 <b>OPS 195 / A-0257</b>	<b>Scaphoid lesion associated to severe comminuted fractures distal radius</b> L Heras-Garcia, L Jabban (United Arab Emirates)
11:42 <b>OPS 196 / A-0343</b>	<b>Finger flexion contracture following chronic tethering of the flexor digitorum profundus muscle after treatment of pediatric forearm fractures</b> N Badur, Th Slongo, E Vögelin (Switzerland)
11:50 <b>OPS 197 / A-0358</b>	<b>Conservative treatment of intra-articular distal radius fractures in patients under 65 years old</b> E Papadogeorgou, A Koukoutsis, P Romoudis, K Nikolopoulos (Greece)
11:58 <b>OPS 198 / A-0394</b>	<b>Surgical treatment of distal radius fractures in patients over 65 years. Our experience</b> D Smarrelli, A Lazzerini (Italy)

SATURDAY 28 MAY 2011

HALL D

## SESSION 25: ELBOW

<b>10:30-12:00</b>	<b>Chair:</b> F da Rin (Italy), A Odinsso (Norway)
10:30 <b>INV 9</b>	<b>Combined elbow injuries</b> G Flugsrud (Norway)
10:55 <b>OPS 241 / A-0022</b>	<b>Treatment of terrible triad without radial head replacement review of 16 cases</b> L Farhadi, RS Kamrani (Iran)
11:03 <b>OPS 242 / A-0094</b>	<b>Use of Coleman technique of fat grafting in the treatment of lateral epicondylitis</b> A Mmoumas, JF Chabas, A Gay, R Legre (France)
11:11 <b>OPS 243 / A-0145</b>	<b>Javelin thrower's elbow</b> H Jaroma (Finland)
11:19 <b>OPS 244 / A-0243</b>	<b>Mosaicplasty to treat osteochondritis dissecans of the elbow: Ten year follow-up in 4 athletes</b> N Szakacs, P Hidas (Hungary)
11:27 <b>OPS 245 / A-0462</b>	<b>Long-term results of the Outerbridge-Kashiwagi procedure in the treatment of the painful stiff elbow</b> S Varitimidis, A Lagaras, Z Dailiana, A Zibis, K Malizos (Greece)
11:35 <b>OPS 246 / A-0467</b>	<b>Distal humeral fractures treated with locked plates. How good are the outcomes?</b> N Thumm, X Ahumada, G Morgan, S Von Unger, J Breyer, C Gomez, R Ide, D Amenabar (Chile)
11:43 <b>OPS 247 / A-0472</b>	<b>Late ulnar nerve palsy after a lateral column procedure for stiff elbow</b> V Psychoyios, S Thoma, A Kotsonis, I Kormpakis, F Villanueva-Lopez (Greece)
11:51 <b>OPS 248 / A-0534</b>	<b>Ideal graft position of the lateral ulnar collateral ligament reconstruction</b> Lee JS, Kang KS, Kang SY, Lee HJ, Yang JJ (South Korea)

HALLA

## CLOSING REMARKS. FAREWELL AND WELCOME TO ANTWERPEN

**12:00-12:30      Closing remarks, Farewell and Welcome to Antwerpen**

## X<sup>TH</sup> EFSHT MEETING

**THURSDAY 26 MAY 2011**
**AUDITORIUM**
**OPENING CEREMONY**
**08:30-09:00**
**Opening ceremony**
**AUDITORIUM**
**KEYNOTE LECTURE**
**09:00-10:00**
**Chair: I Jankov (Norway)**
**IST 1**
**Rehabilitation of the peripheral nerve injured hand - evolving concepts and future strategies**  
 B Rosén (Sweden)
 
**10:00-10:30**
**COFFEE BREAK, EXHIBITIONS AND POSTER VIEWING**
**AUDITORIUM**
**FREE PAPERS: NERVE- AND MAJOR HAND INJURIES**
**10:30-12:00**
**Chair: R Bhopal (UK), T Fairplay (Italy)**
**10:30  
OPT 1**
**Carpal tunnel syndrome Part I: Effectiveness of non-surgical treatments - a systematic review**  
 BMA Huisstede, P Hoogvliet, MS Randsdorp, S Glerum, M van Middelkoop, BW Koes (Netherlands)
 
**10:42  
OPT 2**
**Activity limitations before and after surgical carpal tunnel release among diabetic and non-diabetic patients**  
 R Cederlund, L Dahlin, N Thomsen (Sweden)
 
**10:54  
OPT 3**
**The mirror therapy: Literature review**  
 D Zanin, A Malvicino, N Cosentino, (Italy)
 
**11:06  
OPT 4**
**Patient activity gains after triceps reconstruction in tetraplegia**  
 J Wangdell, J Fridén (Sweden)
 
**11:18  
OPT 5**
**Patients goal improvements do not correlate with functional factors in reconstructive tetraplegia hand surgery**  
 J Wangdell, J Fridén (Sweden)
 
**11:30  
OPT 6**
**Return to work after a serious hand injury**  
 E Ramel, L Dahlin, HE Rosberg, R Cederlund (Sweden)
 
**11:42  
OPT 7**
**Can sense of coherence be an indicator for rehabilitation focus in patients with a severe or major hand injury**  
 R Cederlund (Sweden)

**THURSDAY 26 MAY 2011**
**MEETING ROOM 1 FREE PAPERS: SPLINTING**

<b>10:30-12:00</b>	<b>Chair:</b> G Versümer Bücker (Switzerland), G van Veldhoven (Norway)
10:30 <b>OPT 15</b>	<b>Wrist rehabilitation with the dart-splint: A preliminary experience</b> F Braidotti, A Atzei (Italy)
10:42 <b>OPT 16</b>	<b>Rationale for the design of a thumb cmc orthosis that does not incorporate other joints</b> JC Colditz (USA)
10:54 <b>OPT 17</b>	<b>Post-traumatic PIPj stiffness: Comparing treatment between serial casting and perforated, light and resistant thermoplastic tape</b> I Saroglia, S Centaro (Italy)
11:06 <b>OPT 18</b>	<b>Evidence based static progressive splinting: A literature review</b> DA Schwartz (USA)

**MEETING ROOM 4 WORK SHOP: KINESIOTAPING FOR UPPER EXTRIMITY**

<b>10:30-12:00</b>	<b>Kinesiotaping in treatment of oedema and scar tissue</b> WS1 KK Rønhøj (Denmark)
--------------------	--

**12:00-13:30 LUNCH SERVED IN THE EXHIBITION, POSTER VIEWING**
**AUDITORIUM FOCUS SESSION: INSTRUMENTS TO ASSESS ACTIVITIES – FOCUS DASH**

<b>13:30-15:00</b>	<b>Chair:</b> T Vaksvik, T Aasheim (Norway)
<b>FC1</b>	<b>Instruments to assess activities, with special focus on the DASH</b> L Van de Ven-Stevens, (Netherlands), A Harth (Germany)

**THURSDAY 26 MAY 2011**
**MEETING ROOM 1 FREE PAPERS: TENDONS**

<b>13:30-15:00</b>	<b>Chair:</b> H van Bergh (Netherlands), Å Lier (Norway)
13:30 <b>OPT 19</b>	<b>Influence of the position of the adjacent finger on the excursion of the FDP tendon in a Kleinert mobilization protocol</b> JNM Soeters, JWH Korstanje, R Selles, AR Schreuders, SER Hovius, HJ Stam (Netherlands)
13:42 <b>OPT 20</b>	<b>Rehabilitation of flexor tendon avulsion fractures</b> Y Ataker, S Comert Ece, N Canbulat, E Gudemmez (Turkey)
13:54 <b>OPT 21</b>	<b>A comparison of controlled passive motion and early active motion following flexor tendon repair in zone 2: a pilot-study</b> MH Eissens, S Romkema, JTW van Loenen, CK van der Sluis (Netherlands)
14:06 <b>OPT 22</b>	<b>Rehabilitation of the flexor pollicis longus repairs</b> C Laffargue, A Dinh (France)
14:18 <b>OPT 23</b>	<b>Zone 1 Extensor tendon injury: How to rehabilitate after the surgery of bony avulsion</b> S Comert Ece, Y Ataker, N Canbulat, O Cerezci, E Gudemmez (Turkey)
14:30 <b>OPT 24</b>	<b>Modified relative motion splinting of Zone V &amp; VI extensor tendon repairs</b> MJ Hirth, K Bennett, E Mah, H Farrow (Australia)
14:42 <b>OPT 25</b>	<b>Evaluation of the effectiveness of the conservative treatment with night splint in de Quervaines syndrome: Retrospective observational study</b> S De Santis, P Bortot, L Pegoli, V Padovan, G Pajardi (Italy)

**MEETING ROOM 4 WORKSHOP: MANUAL EDEMA MOBILIZATION (MEM)**

<b>13:30-15:00</b> <b>WS 2</b>	<b>Edema reduction based on the lymphatic system's ability to drain sub-acute edema</b> KK Rønhøj, (Denmark)
-----------------------------------	---

**15:00-15:30 COFFEE BREAK, EXHIBITION AND POSTER VIEWING**

**THURSDAY 26 MAY 2011**
**AUDITORIUM**
**FREE PAPERS: ASSESSMENT**

<b>15:30-17:00</b>	<b>Chair:</b> Chair: B Rosén (Sweden), CP Rosales (Norway)
15:30 <b>OPT 8</b>	<b>Inter rater reliability of finger joints measurement in Dupuytrens Disease</b> C Engstrand, B Krevers, J Kvist (Sweden)
15:42 <b>OPT 9</b>	<b>Disability of the arm, shoulder and hand (DASH) and QuickDASH. Normal values in the general Norwegian population</b> T Aasheim, V Finsen (Norway)
15:54 <b>OPT 10</b>	<b>Research project: A systematic process to develop hand therapy guidelines on assessment</b> L van de Ven-Stevens, M Graff, P Spauwen, H van der Linde, S Geurts (Netherlands)
16:06 <b>OPT 11</b>	<b>Results of the international ICF consensus conference on the ICF core sets for hand conditions</b> KD Rudolf, S Kus, M Coenen, C Dereskewitz, L van de Ven-Stevens, A Cieza (Netherlands)
16:18 <b>OPT 12</b>	<b>Fingers joints angular parameters during a grip of commonly used objects based on a 3-D motion analysis</b> M Pieniazek, T Bazanski (Poland)
16:30 <b>OPT 13</b>	<b>The concurrent validity of screening of activity limitation and safety awareness (SALSA) in persons affected by leprosy</b> U Wijk, J W Brandsma, M Björk (Sweden)
16:42 <b>OPT 14</b>	<b>Diagnostic accuracy of provocative wrist tests</b> R Prosser, L Harvey, P LaStayo, I Hargreaves, P Scougall, R Herbert (Australia)

**MEETING ROOM 1 WORKSHOP: HAND AND BRAIN: MIRROR THERAPY**

<b>15:30-17:00</b>	<b>HAND AND BRAIN IN THEORY AND PRACTICE. MIRROR THERAPY</b>
<b>WS 3</b>	N Grünert-Plüss, J Grünert (Switzerland)

**MEETING ROOM 4 WORKSHOP: KNOW YOUR HANDS; YOUR OWN AND YOUR PATIENTS'**

<b>15:30-17:00</b>	W Brandsma (Netherlands)
<b>WS 4</b>	T Schreuders (Netherlands)

---

 END THURSDAY
 

---

**FRIDAY 27 MAY 2011**
**HALL A**
**DISTAL RADIUS FRACTURES**
**Joint session FESSH/EFSHT**
**08:00-10.00**      **Chair:** H Kvernmo, T Aasheim (Norway)

**See page 95 for the corresponding abstracts**

08:00      **Epidemiology of distal radius fractures**  
L Hove (Norway)

08:10      **Evolution and anatomy of the wrist**  
M Tamai (Japan)

08:25      **Unstable distal radius fractures**  
Y Krukhaug (Norway)

08:35      **Current state of management of distal radius fractures**  
K Prommersberger (Germany)

09:05      **Outcome measurements**  
J MacDermid (Canada)

09:20      **Complications after operative treatment of distal radius fractures**  
J Williksen (Norway)

09:35      **Rehabilitation after distal radius fractures**  
J MacDermid J (Canada)

**This session will continue after the coffee break with focus on surgery**

**MEETING ROOM 1    FOCUS SESSION: CHILDREN'S HAND FUNCTION**
**08:30-10:00**      **Chair:** G van Veldhoven (Norway)

**FC 2**      **How can children's hand function be measured?**  
L Krumlinde-Sundholm, (Sweden) ,G van Veldhoven (Norway)

**10:00-10:30**      **COFFEE BREAK, EXHIBITION AND POSTER VIEWING**

**FRIDAY 27 MAY 2011**
**AUDITORIUM**
**FREE PAPER: MISCELLANEOUS**

<b>10:30-12:00</b>	<b>Chair:</b> A Elmstedt (Sweden), S Ewald (Switzerland)
10:30 <b>OPT 26</b>	<b>Thumb pinch pattern, movement or function</b> P-I Vicenç, S Rivalda Enric (Spain)
10:42 <b>OPT 27</b>	<b>Core Stabilization: A promising approach to the upper extremity injuries</b> C Ayhan, E Unal (Turkey)
10:54 <b>OPT 28</b>	<b>Forces required for package opening - a comparison of hand patients with normative data</b> M Marks, C Muoth, S Schinelle, I Schreib, A Liebmann, J Goldhahn (Switzerland)
11:06 <b>OPT 29</b>	<b>A randomized clinical controlled study comparing the of modified manual edema mobilization treatment with traditional edema technique in patients with a fracture of the distal radius</b> K Knigsand Rønhøj, CLT T Maribo, PT, MHS (Denmark)
11:18 <b>OPT 30</b>	<b>Oedema treatment of the hand: Comparison between compressive bandage and zinc oxide bandage</b> P Boccolari, A Nesti, F Tondelli, S Sartini, (Italy)
11:30 <b>OPT 31</b>	<b>Evaluation of different oedema treatment regimens to minimize resistance in range of motion</b> J Wangdell, A-S Lamberg, J Fridén, (Sweden)
11:42 <b>OPT 32</b>	<b>Neuromuscular and proprioceptive rehabilitation of the hand and wrist in athletes and heavy duty Labourers after TFCC Triangular Fibrocartilage Complex Reconstruction</b> T Fairplay, R Luchetti (Italy)

**FRIDAY 27 MAY 2011**

**MEETING ROOM 1    WORKSHOP: SPLINTING THE PAEDIATRIC HAND**

---

**10:30-12:00**              M Persson (Sweden), G van Veldhoven (Norway)  
**WS 5**

---

**12:00-14:00              LUNCH SERVED IN THE EXHIBITION, POSTER VIEWING**

**AUDITORIUM              FOCUS SESSION: THE PROPRIOCEPTIVE HAND**

---

**14:00-15:00**              **Chair:** P de Bruck (Belgium), T Schreuders (Netherlands)

---

**FC 3**                      **The Science of the Proprioceptive Hand**  
E Hagert (Sweden)

---

**FC 4**                      **Neuromuscular Stability of the Wrist**  
G Salva (Spain)

---

**FC 5**                      **Clinical Applications of Wrist Proprioception**  
M Garcia-Elias (Spain)

---

**FRIDAY 27 MAY 2011**
**MEETING ROOM 1 FREE PAPERS: THE CHILD'S HAND**

<b>14:00-15:00</b>	<b>Chair:</b> N Burr (UK), M Persson (Sweden)
14:00 <b>OPT 33</b>	<b>Hand splints in children with cerebral palsy, effects of maintained or disrupted use</b> L Krumlinde-Sundholm, M Persson, E Arnemo (Sweden)
14:12 <b>OPT 34</b>	<b>Goals and challenges in postoperative rehabilitation in a rare case of syndactyly</b> APP Ratier, LFA Ferreira, MT Ishikawa (Brazil)
14:24 <b>OPT 35</b>	<b>Low impact of congenital hand differences on health-related quality of life</b> MS den Hollander-Ardon, RW Selles, SER Hovius, HJ Stam, WGM Janssen (Netherlands)
14:36 <b>OPT 36</b>	<b>Health-related quality of life in children with congenital hand differences: parent-child agreement</b> MS den Hollander-Ardon, WGM Janssen, SER Hovius, HJ Stam, RW Selles (Netherlands)

**15:00-15:30 COFFEE BREAK, EXHIBITION AND POSTER VIEWING**
**AUDITORIUM FOCUS SESSION: FUTURE CHALLENGES IN HAND THERAPY**

<b>15:30-16:30</b>	<b>Chair:</b> R Cederlund (Sweden), TB Lurie (Norway)
15:30 <b>FC 6</b>	<b>Future challenges in Hand Therapy</b> J MacDermid (Canada)
15:42 <b>FC 7</b>	<b>Treatment Guidelines</b> BMA Huisstede (Netherlands)
15:54 <b>FC 8</b>	<b>Quantitative or qualitative research - that is the question?</b> R Cederlund (Sweden)
16:06 <b>FC 9</b>	<b>ECHT European Certified Hand Therapist</b> A Harth (Germany)
16:18	<b>Certification of the first EFSHT Hand Therapist</b>

**FRIDAY 27 MAY 2011**
**MEETING ROOM 1 FREE PAPERS: OSTEOARTHRITIS AND ARTHROPLASTIES**

<b>15:30-16:30</b>	<b>Chair:</b> U Wendling-Hosch (Switzerland), T Kalheim (Norway)
15:30 <b>OPT 37</b>	<b>Total wrist arthroplasty in a high demand patient group. Report from a prospective clinical study with the Motec wrist prosthesis developed at our department</b> T Lütken, O Reigstad, B Bolstad, S Roness, M Røkkum (Norway)
15:42 <b>OPT 38</b>	<b>Rehabilitation after total wrist arthroplasty in rheumatoid patients</b> G Guidi, M Ceruso, S Pfanner (Italy)
15:54 <b>OPT 39</b>	<b>PIP Pyrocarbon prosthetic replacement using a lateral surgical approach: Post-operative rehabilitation protocol with early active motion</b> G Guidi, M Ceruso, S Pfanner (Italy)
16:06 <b>OPT 40</b>	<b>Rehabilitation protocol after suspension arthroplasty of thumb basal joint osteoarthritis</b> Y Ataker, S Comert Ece, N Canbulat, A Gulgonen, E Gudemez, (Turkey)
16:18 <b>OPT 41</b>	<b>Outcome measures in surgical and conservative management of trapeziometacarpal osteoarthritis - a systematic literature review</b> M Marks, J Goldhahn, C Kolling, C Muoth, J Schoones, D Herren, RGHH Nelissen, TPM Vliet Vlieland (Switzerland)

**AUDITORIUM CLOSING CEREMONY**

<b>16:30-17:00</b>	<b>Closing Ceremony</b>
--------------------	-------------------------

**AUDITORIUM GENERAL ASSEMBLY**

<b>17:00-17:45</b>	<b>NFH General Assembly (Årsmøte - Norsk forening for håndterapi)</b>
--------------------	---

**19:30 CONGRESS DINNER AT THE OSLO OPERA HOUSE**

**FRIDAY 27 MAY 2011**
**SPISERIET MØLLER EFSHT POSTERS**

<b>PPT 1</b>	<b>Range of motion for patients with Dupuytren's contracture three months after surgery and rehabilitation</b> L Borén, C Engstrand (Sweden)
<b>PPT 2</b>	<b>Clinimetric evaluation of measurement tools used in hand therapy to assess activity and participation</b> K Schoneveld (Netherlands)
<b>PPT 3</b>	<b>Validation of the Michigan hand outcomes questionnaire-Dutch language version in patients with Dupuytren's disease</b> K Schoneveld (Netherlands)
<b>PPT 4</b>	<b>Assesing hand grip strength of upper extremities: A comparitive study</b> F Altug, N Beker, E Kavlak, U Cavlak (Turkey)
<b>PPT 5</b>	<b>Analysing the reliability of DASH in three parts of the upper extremity separately</b> C Ayhan, E Unal, Y Yakut, (Turkey)
<b>PPT 6</b>	<b>Assisting hand assessment (AHA); A further elaboration and validation for adult handprosthesis users</b> P Vikström, L Kruumlinde-Sundholm, C Ragnö, A Stockselius, B Rosén (Sweden)
<b>PPT 7</b>	<b>Influence of the elbow position in measuring pro- and supination of the forearm</b> GJ Kroon, S Brink (Netherlands)
<b>PPT 8</b>	<b>The use of daily activities in assessment tools for mapping hand-function - a systematic review</b> TA Magne, AV Pedersen (Norway)
<b>PPT 9</b>	<b>Comparison of static and dynamic splinting regimens for extensor tendon repairs in zones V to VII</b> A Kitis, RH Ozcan, D Bagdatli, IG Kara (Turkey)
<b>PPT 10</b>	<b>Short term functional results of local corticosteroid injections at the management of shoulder pain</b> N Beker, S Akkaya, N Akkaya, A Kitis, C Yorukoglu (Turkey)
<b>PPT 11</b>	<b>A review of orthoses to increase function after radial nerve injury</b> E Seeley, M Szekeres, J Rooney (Canada)
<b>PPT 12</b>	<b>3D anatomy glove learning system for teaching and refreshing hand anatomy knowledge</b> AM Agur (Canada)
<b>PPT 13</b>	<b>Use of silastic tubes to optimise skin healing after complex digital injuries</b> AL Garel, G Mezzadri, G Herzberg (France)
<b>PPT 14</b>	<b>Use of Neopren Splint to treat post-traumatic PIP joint flexion deformity</b> V Duclos, F Plotard, G Herzberg (France)

**FRIDAY 27 MAY 2011**
**SPISERIET MØLLER EFSHT POSTERS**

<b>PPT 15</b>	<b>Enhancing Function through Tendon Transfers</b> DA Schwartz (USA)
<b>PPT 16</b>	<b>Complete closed FDP rupture, presenting with active DIP flexion</b> SJM Knijnenburg-Janse, TAR Schreuders, HP van Not (Netherlands)
<b>PPT 17</b>	<b>X-Lite and Neoprene Splint Combinatin Technique</b> RC Tellez (Spain)
<b>PPT 18</b>	<b>Early Active motion in zone 2. Results</b> RC Tellez (Spain)
<b>PPT 19</b>	<b>Morphological assessment of a musician's hand, applied to physiotherapy</b> S Del Valle Acedo (France)
<b>PPT 20</b>	<b>Effectiveness of interventions for secondary Raynaud's Phenomenon - a systematic review</b> BMA Huisstede, P Hoogvliet, WD Paulis, M van Middelkoop, M Hausman, JH Coert, BW Koes (Netherlands)
<b>PPT 21</b>	<b>The sprain of the ulnar ligament (LLU) of the metacarpophalangeal joint (MCP) of the thumb; The particularities of the rehabilitation</b> C Le Lardic (France)
<b>PPT 22</b>	<b>The use of neoprene tube finger in the treatment of proximal interphalangeal flexion stiffness</b> E Mancon, S Paparo, P Rossi, G Pajardi (Italy)
<b>PPT 23</b>	<b>Rehabilitation of the nerve compression syndromes of the upper limb, about a continuous set bi operator of 65 cases seen in 2006</b> F Degez, C Blouin, Y Saint Castes, G Raimbeau (France)
<b>PPT 24</b>	<b>Thumb fractures : rehabilitation and splinting following intra-articular fracture of the trapezometacarpal joint</b> S Celerier, C Camps, M Isel, M Merle (France)
<b>PPT 25</b>	<b>Small hands- big challenges! Palmar burns in children</b> C Sivertsen (Norway)
<b>PPT 26</b>	<b>Comparative measures of the instantaneous strength by tightening the fist in pronation and supination. (based on a sample of 301 cases)</b> F Bouillot, F Degez, J Arnault, B Largentot, JM Marion (France)
<b>PPT 27</b>	<b>Does wrist immobilization following carpal tunnel release improve functional outcome? A literature review</b> SM Isaac, T Okoro, I Danial, C Wildin (UK)
<b>PPT 28</b>	<b>Silicone, pressure therapy and massage in hand scars management: a review of the literature</b> V Padovan, S Seppi, V Ferrario, G Pajardi (Italy)
<b>PPT 29</b>	<b>The Introduction of a Certificate of Advanced Studies in Hand Therapy Program in Switzerland</b> S Ewald, C Struchen, V Beckmann-Fries (Switzerland)

**ABSTRACTS  
JOINT SESSIONS  
FESSH / EFSHT**

## EPIDEMIOLOGY OF DISTAL RADIUS FRACTURES

Mr. Leiv M. Hove, MD, PhD, Professor

Department of Surgical Sciences, University of Bergen (Norway)

Fracture of the distal radius is the most common fracture and accounts for 15-20% of all fractures. The population of Norway has the highest incidence of distal radius fracture reported. The purpose of this presentation is to discuss epidemiological studies on distal radius fractures.

**Methods:** In Norway we have performed epidemiological studies of fractures of the distal radius in urban and rural areas. The studies were performed among patients →20 years of age in Oslo in 1979 and 1999, Bergen in 1988, and in Aust-Agder (rural) in 1996, respectively.

**Results:** The mean (range) ages in the different series were 63 (20-96) years for women in Bergen, and 69 (20-99) years in Oslo; - for men 47 (20-91) years in Bergen and 51 (20-92) years in Oslo, respectively. The annual fracture incidence was 38 per 10.000 (95% CI 35-41). The age-adjusted fracture rates per 10.000 for the age group →50 years were 114 for women i Bergen, 108-110 in Oslo (1988 and 1999, respectively), and 90 in Aust-Agder. Similar numbers for women below 50 years of age were 14, and for men 17. For men the number of fractures was more or less constant throughout the years. Age and sex-specific incidence rates in women rise steeply after menopause, stabilise or even fall in higher age. Seventy-nine percent of the fractures were in women, and low-energy traumas accounted for 81% of the fractures. The activities leading to fracture differ

between men and women. In men most fractures occur in working or sports activities, in women more fractures are related to home activities. For both men and women most fractures occur while walking outdoors, which makes the weather an important factor. We found seasonal variation in fractures from low-energy trauma in women, with a fourfold increase (mean 4, range 1-11) in incidence rates on days with temperatures below freezing point (- opposite in children with highest incidence in summer months). The relative risk of fractures in immigrants from Asia was 0.72 (95% CI 0.53-1.00) compared with ethnic Norwegians. Thirty to fifty percent of the patients with fractures from low-energy trauma met the criteria for osteoporosis according to the WHO-definitions (T-score < -2.5: 31%, T-score < -2.0: 51%). Ten percent of the patients with distal radius fractures had simultaneous fractures of other bones.

**Conclusions:** The incidence rates of distal radius fracture in Norway are higher in urban than in rural areas, and higher in ethnic Norwegians than in immigrants. The Norwegian studies (and most other series) show that the age-specific incidence of distal radius fractures in women plateaued after the age of 60. Only 30% to 50% of the patients with fractures from low-energy trauma met the criteria for osteoporosis. These findings indicate that factors other than bone mass may contribute to the fracture: the type of trauma, the tendency to fall, the type of fall, and the associated protective responses.

## EVOLUTION AND ANATOMY OF THE WRIST JOINT

Mr. Makoto Tamai, MD, PhD

Department of Orthopaedic Surgery, Sapporo Medical University, Sapporo, Hokkaido (Japan)

In the history of evolution, the human wrist joint obtained a great mobility by freeing hands from locomotion and by handling tools. It is mentioned that the acquirement of mobile DRUJ is one of the hallmarks of the late-evolving hominids, in marked contrast with the syndesmotic DRUJ in most animals. The increasing mobility of the wrist joint promoted development of the triangular fibrocartilage complex (TFCC).

The wrist joint consists of five bony components: 1) radius; 2) ulna; 3) proximal carpal row; 4) distal carpal row; and 5) pisiform. These components are connected with extrinsic (capsular) ligaments and construct four functional joints: 1) distal radioulnar joint (DRUJ); 2) radiocarpal joint; 3) midcarpal joint; and 4) pisotriquetral joint. The capsular ligaments of the wrist joint are classified into following five groups: dorsal radiocarpal ligament (DRCL); dorsal intercarpal ligaments (DICL); palmar radiocarpal ligaments (PRCL); palmar intercarpal ligaments (PICL); and palmar ulnocarpal ligaments (PUCL).

The PRCL have significant appearance compared with the PUCL. The radioscaphecapitate ligament (RSCL) was divided into three bundles according to their carpal attachments, i.e. radioscapheoid bundle (RSB), radiocapitate bundle (RCB) and radiotriquetral bundle (RTB). Regarding to the long radiolunate ligament (LRLL), a continuous bundle between radius and triquetrum parallel to the RTB covered the distal one third of palmar aspect of the LRLL and the palmar lunotriquetral ligament (PLTL). The short radiolunate ligament (SRLL) seemed to be an elastic ligament that made up the

inner palmar wall of the radiocarpal joint capsule. Five ligaments attach to or surround the TFCC: ulnolunate ligament (ULL), ulnocaipitate ligament (UCL), ulnotriquetral ligament (UTL) and palmar and dorsal radioulnar ligaments (PRUL and DRUL). PRUL and DRUL both divide into proximal (= deep) and distal (= proximal) bundles at their attachments to the ulna. Their proximal fibers interdigitate with PUCL and attach to fovea of the ulnar head; their distal fibers attach to tip of the ulnar styloid process (USP) surrounded by the PUCL and the distal extension of PRUL. Since the ulnar portion of the PUCL and the radioulnar ligaments (RUL) were not clearly separable, they can be called the "palmar radioulnar-ulnocarpal ligamentous complex (PRUUCLC)" that is the main ligamentous support of TFCC.

The TFCC consists of RUL, articular disc, meniscus homologue, sheath of extensor carpi ulnaris (ECU) tendon, PUCL and ulnar capsule, and acts as a major stabilizer of DRUJ. The articular disc is contained within the RUL. The meniscus that is considered as a spacer in the synovial joint cavity exists attached on the dorsal and palmar wall of the ulnar sided wrist capsule. The ECU tendon sheath unites with the dorsal aspect of the ulnar capsule. The prestyloid recess that can be seen at the most ulnar corner of the TFCC is considered as a tunnel through which the ulnar head was excluded from the wrist joint and became the USP during the evolutionary process.

The existence of wide anatomical variations around the ulnar wrist may suggest that the human wrist is still on its way of evolution.

## UNSTABLE DISTAL RADIUS FRACTURES. MEANING AND RELEVANCE

**Mr. Yngvar Krukhaug, MD, PhD, Associate Professor**

Consultant Orthopaedic Surgeon, Haukeland University Hospital, Bergen (Norway)

The subject of instability in fractures of the distal radius has been the focus of considerable interest for many years. Various factors, such as severe dorsal comminution, important dorsal angulation and radial shortening, and advanced age, have been associated with the secondary displacement seen in this type of fracture. It is assumed that there is a correlation between the severity of the primary displacement and the loss of reduction. There is also general agreement that there is a close relationship between anatomy and function.

The treatment of unstable distal radius fractures has also been the focus of considerable interest for the latest years, especially after the introduction of the angular stable distal radius plates.

Stable fractures can be managed conservatively, with good anatomical and functional results.

Various studies have defined factors that are predictive of instability.

An unstable distal radius fracture is classified according to the following anatomical criteria based on the radiological study on admission:

- Dorsal angulation more than 20°
- Dorsal comminution
- Intra-articular radiocarpal' fracture associated
- Ulnar fracture

These criteria, as well as age over 60 years, were considered as factors of instability capable of inducing secondary displacement.

In earlier days standard initial management of a displaced fracture was closed manipulation followed by application of a cast. Instability was diagnosed by radiographic examination between one and two weeks later. If appropriate, definitive surgical treatment was instituted at that stage for fractures displaying early instability. However, fractures that exhibited instability after two weeks were not detected by this management protocol.

In a study by Mackenney et al. in 2006 prediction of instability in distal radius fractures, as comminution, initial dorsal angulation, ulnar variance, carpal alignment and age, has been outlined.

The treatment options of unstable fractures of the distal radius include plaster of Paris combined with pins, external fixators (bridging, non-bridging and dynamic) that may be combined with pins, and ORIF with plates (angular stable or standard, dorsal or volar). There is little evidence in the literature to help surgeons choose among these methods in the individual patient with unstable fractures. Thus, to some degree expertise and tradition determine the mode of treatment at different centres.

## CURRENT STATE OF MANAGEMENT OF DISTAL RADIUS FRACTURES

**Mr. Karl-Josef Prommersberger, Professor**  
Klinik für Handchirurgie, Bad Neustadt (Germany)

Our goal in treating patients with distal radius fractures is anatomic reduction as base of an optimal hand and wrist function. In order to gain this goal, distal radius fractures are approached by three questions:

1. Who is the patient?
2. What is the extend of articular involvement?
3. What is the integrity of metaphyseal support?

The first question highlights the role of the patient interview and examination. The history and physical examination should include, age, occupation, daily activity level, and general medical condition. The second question addresses the extent of fractures involving the articulations between the radius and the proximal carpal row, and the radius with the ulnar head. The final outcome on distal radius fractures depends primarily on residual joint stability and the presence or absence of posttraumatic arthritis of the DRUJ. For the radiocarpal joint surface of the distal radius it is generally accepted that a greater than 2 mm step offs or gaps is likely to lead to an unacceptable outcome. In addition, radial styloid fractures with the fracture line ending at the scapho-lunate gap should be suspected of the concurrence of the distal radial fracture with a scapho-lunate dissociation. The third question directs the surgeon to determine the metaphyseal support. If the volar metaphysis is involved the fracture may be reducible but will never maintain reduction. Dorsal fractures with involvement of greater than one-third of the sagittal diameter of the radius metaphysis may redisplace despite excellent close reduction, because those fractures are inherently unstable. Extensive metaphyseal comminution with involvement of both the dorsal and volar metaphysis makes it more difficult to restore the alignment of the distal fragments and leaves them with little or no bone-to-bone contact to help prevent loss of alignment despite external fixation with or without ancillary K-wires or internal fixation with a single dorsal or volar plate.

Treatment options for fractures of the distal radius can be divided into non-operative or operative treatment. The surgical options of treatment of distal radial fractures can be categorized into three main tools that may be used individually or in combination to obtain stability: percutaneous pinning, external fixation, and internal fixation. Whether patients have a non-displaced fracture requiring a minimal degree of immobilization or a markedly displaced fracture requiring open reduction and internal fixation, all patients need to be instructed and encouraged to perform hand and finger exercises. Shoulder and elbow motion should also be encouraged and maintained during healing, especially in the elderly.

An innumerable and ever-increasing variety of implants for internal fixation of distal radius fractures continue to appear, largely as a result of the attempts by many different companies to corner a part of this market. This together with a steady stream of case series claiming excellent results in the treatment of distal radial fractures using one special plate or another may be tiresome. Nonetheless, we believe there have been some important developments. One was the inauguration of fixed-angle plate fixation and the other the development of the fragment specific fixation.

## ARTHROSCOPIC MANAGEMENT OF DISTAL RADIUS FRACTURES

**Mr. F. del Piñal**

Private practice and Hospital Mutua Montañesa. Santander (Spain)

Arthroscopy allows to see inside the joint the quality of the articular reduction, under ideal illumination and magnification. It is cumbersome particularly if water is used to maintain the optic cavity. It is imperative to follow the correct sequence in order to be able to modify the fixation should the need arise. We suggest the following: Preliminary volar locking plate application, reversible fixation (Kirschner-wires through the plate), arthroscopic (dry) tuning, and then stable (locking pegs) fixation under arthroscopic guidance.

We have operated more than 200 articular distal radius fractures under arthroscopic control. None of our cases were considered a failure nor did the arthroscopy have to be abandoned. In order to test the feasibility and outcome of the above protocol, we extracted a subgroup of the 16 consecutive most comminuted fractures. They all had "explosion fractures": more than five articular fragments and/or a free osteochondral fragment. At a minimum of two years they were called back for the purpose of this study. Except in one case where the extra-articular reduction was lost, in the rest, the radiographic parameters were satisfactorily maintained. Range of motion was 105 ° of flexion-extension; Grip strength was 85% of the contralateral, and a DASH of 6. This study confirms that (dry) arthroscopy is feasible in the most severely articular comminuted C3 fractures, and our results compare favorably with other similar case series. In a more recent case, out of the study group, one patient suffered collapse of the lunate fossa and required radio-lunate arthrodesis.

## HOW TO EVALUATE AND TREAT CONCOMITANT CARPAL INJURIES WITH DISTAL RADIUS FRACTURES?

**Mr Tommy Lindau MD, PhD**

Consultant Hand Surgeon, Pulvertaft Hand Centre, Derby (UK)

Distal radial fractures are part of wrist injuries, where radial styloid fractures may be part of incomplete or complete greater arch perilunate dislocations. Consequently, the obvious distal radius fracture may be associated with any kind of incomplete or complete injuries along the greater arch. This was actually shown more than 10 years ago. Longitudinal studies have shown that peripheral triangular fibro-cartilage complex (TFCC) tears lead to DRU-joint instability, cartilage injuries lead to early osteoarthritis (OA) and scapho-lunate (SL) ligament tears Grade 3-4 lead to radiographic SL dissociation after a year.

The role of arthroscopy in distal radius fractures is today two-fold; firstly to give excellent accuracy in the intra-articular reduction as we know that intra-articular incongruity of more than 1mm is associated with the development of secondary OA. Secondly, the role of arthroscopy is to detect and treat associated ligament and cartilage injuries.

In addition to decision making in managing the actual distal radial fracture, the review of the radiographs should address direct and indirect signs of associated ligament injuries.

- Firstly, assess the degree of displacement of the ulnar styloid fracture, which may be indicative for an ulno-radial ligament detachment (peripheral TFCC injury).
- Secondly, check the three carpal arcs of Gilula, which are indicative for intercarpal ligament injury.
- Thirdly, assess palmar cortex for tear drop signs; i.e. signs of avulsed radio-carpal ligaments.
- Lastly, be aware that palmarly displaced fractures can cause radial artery injuries, flexor tendon ruptures or median nerve entrapments (carpal tunnel syndrome, CTS).

Obviously arthroscopy is the only way to completely rule out all associated injuries and this added adjunct should be considered in non-osteoporotic patients especially in high-energy trauma.

In the absence of arthroscopy, a fluoroscopic assessment including stress views, before reduction and fixation is mandatory to appropriately plan the surgical approach. A traction view is very useful to see whether the carpal arcs of Gilula are disrupted. Intercarpal ligament injuries can also be examined with an ulnar and radial deviation in order to see any gapping between the carpal bones. The DRU joint is difficult to assess before the distal radius fracture has been stabilised especially if there are dorsoulnar fragments involved. After reduction and fixation of the distal radius fracture a new assessment of the intercarpal ligaments and the DRU joint stability should be done.

If the distal fracture is treated well and associated injuries can either be ruled out or be found and treated, we can hope for better outcomes after the most frequent fracture in the body.

## HOW TO DEAL WITH CONCOMITANT ULNAR SIDED WRIST INJURIES

**Mr. Jan-Ragnar Haugstvedt MD, PhD**

Senior Consultant, Section of Upper Extremity and Microsurgery  
Orthopedic Department, Oslo University Hospital (Norway)

Patients that sustain from a distal radial fracture may end up suffering from ulnar sided wrist pain due to an initially overseen or improperly treated ulnar sided concomitant injury. While important stabilizing structures of the DRUJ are discussed in other talks in this session we will here discuss the importance of the ulnocarpal (UC) ligamentous complex and the bone (ulna) itself.

It has been shown that in a fall with the hand in a forced supinated and deviated position, a fracture with significant initial displacement will be associated with a soft tissue lesion around the ulnar head with a progressive tear of the ECU tendon sheath, the capsule, displacement of the TFCC and rupture of the deep TFCC fibers causing an instability of the ulnar structures. A volar dislocation is often present with the ulnar head presenting in the wound. In these cases a repair of the stabilizing structures should be performed from the volar side.

There have been many papers discussing what to do with an associated ulnar styloid fracture to a fracture of the distal radius. While some authors advise repair and stabilization of the fractured (or avulsed) ulna, others claim that this has no effect. In some studies with volar plating of the distal radius fracture, conclusions have been made that an accompanying ulnar styloid fracture has no adverse effect on the outcome. However these studies seem to have been performed without including a group where osteosynthesis of the fractured or avulsed ulna was performed. The effect of testing the stability of the radioulnar joint also seems to give different results from different studies.

A suggested conclusion will be to evaluate the injuries of the radial and the ulnar sides, then to perform a stable osteosynthesis of the radial fracture. If an open injury of the DRUJ exists the soft tissue injuries should be addressed. A test of the DRUJ stability should be performed while the patient is still in surgery; if the joint is stable, then accept; on the contrary an osteosynthesis of the fractured ulna and/or an immobilization in a cast or a transfixation should be considered.

## ARTHROSCOPIC FINDINGS OF THE FOVEAL DETACHMENT OF THE TFCC IN DISTAL RADIUS FRACTURES

**Presenter:** Mr. Toshiyasu Nakamura (T. Nakamura, Y. Obara, M. Okazaki, K. Sato, Y. Toyama, H. Ikegami)  
Department of Orthopaedic Surgery, School of Medicine, Keio University, Tokyo (Japan)

**Background:** Fracture of the ulnar styloid process and triangular fibrocartilage complex (TFCC) injury often accompanied by distal radius fracture. In the present study, an arthroscopy of the radiocarpal and distal radioulnar joints was performed to assess TFCC injury in every distal radius fracture. We evaluated incidence of ulnar styloid process fractures with TFCC injuries in this series. We also evaluated DRUJ arthroscopy findings on the detachment of the TFCC in distal radius fractures.

**Method:** We evaluated sequential 100 wrists of 98 patients who underwent reduction and internal fixation of distal radius fractures. Average age was 60.7 years (range, 15-83 years), right hand in 40 and left in 60. The fracture type was A2 in 26, A3 in 14, B3 in 6, C1 in 19, C2 in 30, and C3 in 5 (AO system). An ulnar distal fracture was seen in 63 wrists; tip in 13, middle in 19, base-horizontal in 21, base-oblique in 1. The foveal avulsion fracture was found in 5, neck fracture in 5 hands and head fracture in 3 wrists. The radiocarpal and DRUJ arthroscopy were performed in all cases. TFCC injuries, including tear/perforation of the disc proper, 1D type injury and detachment of the TFCC at the ulnar fovea were identified. Clinical outcome, fracture type of the radius and ulnar styloid, and type of TFCC injury were evaluated. The avulsion of the TFCC at the fovea and /or fracture of the ulnar styloid were repaired/refixed with positive findings on the DRUJ arthroscopy. The clinical results were assessed using Mayo modified wrist scores.

**Results:** 67 wrists indicated TFCC tears (67%). 1A tear was found in 39 wrists, while 24 indicated radial slit tear (1D type tear). Foveal detachment of the TFCC was seen on DRUJ arthroscopy in 36 wrists (36%) (average age: 68.0 years). Ulnar styloid fracture was observed in 54 wrists (54%) (average age: 66.0 years). The occurrence of foveal detachment of the TFCC was not statistically related to ulnar styloid fracture nor type of the fracture of the radius. The overall average Mayo modified wrist scores were 89.2 points.

**Conclusion:** Results of the present study suggest that TFCC injury in distal radial fractures can occur with or without all types of ulnar styloid fractures. associated with and can be unstable. Also, TFCC detachment injury was seen in all cases with ulnar fovea avulsion that can be easily ascertained without arthroscopy.

## IS NEW CLASSIFICATION OF DISTAL RADIUS FRACTURE NECESSARY?

**Mr. Makoto Tamai, MD, PhD**

Department of Orthopaedic Surgery, Sapporo Medical University, Sapporo, Hokkaido (Japan)

An ideal classification of fractures would clearly identify the specific fracture characteristics and aid the decision making concerning choice of treatment method, and at the same time facilitate the prediction of treatment outcome. The information shared amongst medical practitioners must be valid in order to reliably and consistently read the imagery for diagnosis of fracture type. In addition there must exist a similarly high degree of consensus for diagnosis between different testers.

In the past, many classifications of distal radial fractures have been proposed. However with the introduction of a precise X-ray imagery including a high resolution 3D CT, diagnostic capabilities have increased and, as a result, "unclassified" or "marginal type" fractures that do not match with any representative fracture models in the classical classifications have been discovered. Also with the use of arthroscopy for intraarticular fractures and locking plate systems, surgical results have greatly improved in all types of distal radius fractures and the treatment outcome no longer correlates only with the fracture classification.

The author suggest a new classification system for distal radius fractures that can easily and clearly differentiates various types of distal radius fractures to correctly assess fracture severity and apply appropriate treatment methods. The radiographs of surgically intervened distal radius fractures were examined and the following radiographic findings (factors) that were considered to affect the surgical decision-making were

extracted: 1) type of deformity ("T" factor); 2) presence and severity of intraarticular fracture ("A" factor); 3) presence and location of metaphyseal comminution ("M" factor); 4) presence and severity of fracture involving diaphyses ("D" factor); and 5) presence and severity of radial translation ("R" factor). In addition to these five factors, the 6) type of associated ulnar fracture ("U" factor) was included for its importance in determining the severity of the injury and in deciding the method of treatment. These factors were categorized into four types or four grades, respectively, and used to assemble a modular style classification system. In order to describe a distal radius fracture, a type or a grade in each factor is identified on the radiographs and listed in T, A, M, D, R order. In addition, adding the U element could be used to classify distal radio-ulnar fractures in the "TAMDR+U" system.

The TAMDR+U classification method easily diagnoses fracture types and is an excellent tool for providing detailed information about the fracture to third parties. This classification would be helpful in understanding varieties of distal radius fractures and choice of treatment plan for each fracture including a surgical indication, a method of reduction, a type of fixation, and a choice of implant. For research, the control of detailed information concerning fractures and assigning point scores for the various factors will result in a scoring system that evaluates the severity of fractures. To advance its clinical applications, the repeatability and the reliability of this fracture classification should be addressed.
